

PARD MT 3 and MT 5 Manual

Dec 2023

Applies to New Zealand Market

Notes

Both models have been tested by us and have a hunting Return to Zero / QD level of accuracy

Our tests measured 0.25 MOA of variation

This is NOT guarantee

Some Notes

When attaching the mount to the rifle, you need to always:

1. Put it back in the same place
2. Push FORWARDS on the mount to press the recoil lug into the rail
3. Hold the mount firm while closing the lever
4. Proper Picatinny Rails are required
5. The rail must be clean, small amounts of debris can change the point of impact
6. Adjust the level tension evenly so it is firm with the allen bolts
7. TEST it before hunting

They are good mounts and allow you to either move the scope between rifles, or to dual use the scope as a handheld and a riflescope
