SUBLI VISTA

Welcome to Subli Vista!

The Home of Environmentally Progressive Premium DIY & Professional Sublimation Coatings

Powerful & Food Safe

Subli Vista has the most powerful product composition on the market today. Our active ingredients by volume surpasses other brands, giving you stunning results 1st time, every time.

We have designed Subli Vista to be safe to use on mugs, tumblers, glasses and plates.

Environmental by Design

We are all unique but we are all linked by sharing the same planet. Subli Vista is the most environmentally progressive sublimation coatings company on the planet today.

We are happy to be on record with our Subli Zero 2030! pledge.

Subli Zero 2030!

We all know we have a personal duty to protect the planet when it's possible for us to do such things. Be this by simply recycling our waste to bigger statements such as never using an aeroplane again, or any number of things in between no matter how small the action.

As Subli Vista is a chemical coatings manufacturer we feel we have a more committed duty to the environment than most manufacturers, and for that reason we have created our Subli Zero 2030! pledge. This pledge will guide how we operate today, and in the future. More importantly it will guide us how we design and manufacture the next generation of Sublimation Solutions, Sprays and Liquids.

Our pledge is a simple one, but a powerful one, that is by 2030 we will be producing and selling only 100% environmentally friendly products.

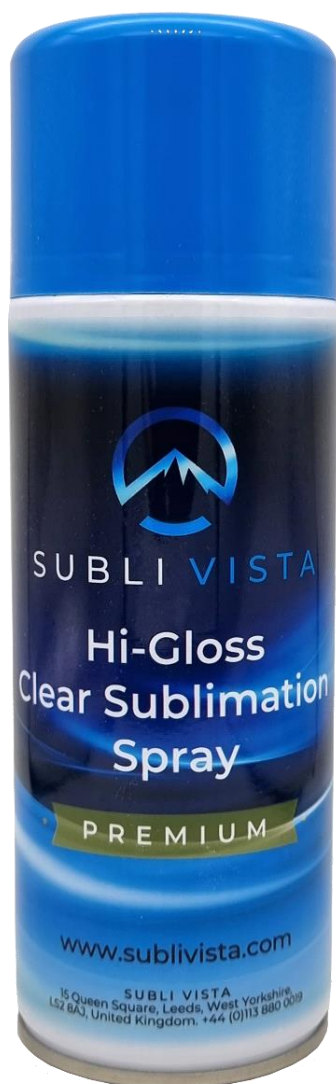

All our efforts, actions and decisions will be with this one goal in mind, we hope we can achieve this well before 2030 because we cannot wait. None of us can wait for solutions that benefit each other and the planet we live on.

SUBLI VISTA

Subli Vista Premium DIY Hi-Gloss Sublimation Spray 400ml

Product Code: DHG400

This Product

Is specifically designed to allow the transfer of a sublimation image onto a non-sublimation ready surface. Should you require a white layer for vibrancy of the image simply apply Subli Vista White Brilliance Satin Undercoat.

How to Apply

Shake for 30 seconds to activate the product. Spray onto the substrate at 20cm spraying left to right and from top to bottom. Turn the substrate 90 degrees and repeat.

How to Cure

Once sprayed leave the substrate for up to 10 minutes then cure in an oven at 160C or 320F for 20 minutes depending on the thermal properties of the substrate. The product should be allowed to cool before pressing an image onto it.

Clean the Nozzle

After spraying turn the can upside down and depress the nozzle for 3 seconds to clean the nozzle for next use. This step is not required but will prolong the smooth spray life of your aerosol nozzle.

SUBLI VISTA

Subli Vista Premium DIY Ultra Violet Active-Defence Spray 400ml

Product Code: DUV400

This product

Is specifically designed to help stop the Sun's rays from bleaching colours in direct sunlight, it is weatherproof after drying and designed for indoor & outdoor use. In tests a 32micron layer will block out 100% UVC, 99.9% UVB & 98.8% UVA radiation from the sun prolonging colour life by years.

How to Apply

Shake for 30 seconds to activate. Spray onto the substrate at 20cm spraying left to right and from top to bottom. Turn the substrate 90 degrees and repeat 3 times for best protection.

How to Cure

Air Cured only. Do not force cure in an oven. In ambient conditions this product is touch dry after 1 hour and fully cured after 24 hours.

Clean the Nozzle

After spraying turn the can upside down and depress the nozzle for 3 seconds to clean the nozzle for next use. This step is not required but will prolong the smooth spray life of your aerosol nozzle.

SUBLI VISTA

Subli Vista Premium DIY Sublimation Adhesion Promoter Liquid 250ml

Product Code: DAP250

This product

Is specifically designed to provide a spray receptive layer to hard shiny or hi-gloss surfaces such as metals, ceramics and glass. At a chemistry level this product when applied to the glossy surface will leave behind a layer of molecular binders on the surface. You cannot see these binders but they are there and will hold the Subli Vista Sublimation sprays on the surface evenly and will not allow them to run. The difference is clear, when using Subli Vista Sublimation Adhesion Promoter you get a perfectly even spray layer on the hi gloss surface you are spraying. An even sublimation surface on which to press an image is very important in providing for an impressive finished result.

How to Apply

Apply to the product surface using a soft, clean, lint free cloth making sure to wipe into the surface evenly. One liberal coat should be enough but if you want more protection wait until dry then simply apply another coat.

After Applying

Remove any excess liquid from the surface and allow to air dry for 5 minutes. Once dry spray on top your chosen Subli Vista product.

SUBLIVISTA

Subli Vista Premium DIY Hi-Gloss Wood Sublimation Liquid 500ml

Product Code: DWG500

This Product

Is specifically designed to allow the transfer of a sublimation image onto non sublimation ready wood and composite wood surfaces. Simply apply as directed and you will have a permanent Hi-Gloss sublimation layer on which to transfer your sublimation image. If you require a white brilliance undercoat layer to give vibrancy simply apply Subli Vista White Brilliance Undercoat before the Hi-Gloss Liquid.

How to Apply

Apply to the product surface using the Subli Vista Liquid Application Product from left to right coating smoothly and evenly from top to bottom. One liberal coat should be enough but if you want cure first then apply another coat.

How to Cure

After Application wait 5 minutes then cure in an oven or under a heat press at 80°C/180°F for 20 minutes.

Clean the Applicator

Clean the product applicator by running it under warm water. Once clean dry with a soft, clean cloth and store safely for next use.

SUBLI VISTA

Subli Vista Premium DIY Liquid Product Applicator 1 inch/25mm

Product Code: DLPA10

The Applicator

Our Subli Vista Premium DIY Liquids require a good quality applicator to avoid any bristles detaching from the applicator and being left behind in your coating. Our applicator is made from Beech wood and comes from responsibly source stock, the bristles are made from natural fibres and all fixed together in a secure metal casing. This product is made in the UK by our oldest applicator manufacturer dating back over 150 years. Using this manufacture guarantees a low carbon footprint whilst building in over 150 years of product design and construction know how.

How to Apply

When applying any Subli Vista product you should always make sure the surface is clean, dust and grease free. Apply the liquid smoothly and evenly working from left to right and from top to bottom. Apply only one liberal coating at a time. If you want more layers of Subli Vista simply cure between applying additional layers.

Clean the Applicator

Clean the applicator by running it under warm water, once clean dry the applicator with a soft clean cloth and store safely for next use.
