

Quilt

Designer: Pearson Lloyd

Year: 2007

Quilt is the expression of a timelessly charming elegance, perfectly suited to both home and contract environments. The distinctive quilting on the backrest offers a pleasing sense of comfort, both to the touch and to the eye, while the steel base adds lightness to the solid, rigorous volumes of the seating. Quilt is available as an armchair, a sofa in a range of sizes, and a square pouf.

Developed by Tacchini in Italy

Quilt

Designed by Pearson Lloyd, 2007 Cat. Sofas

Materials description

Internal frame: poplar plywood 18 mm thick.

Padding: differentiated - density polyurethane foam.

Base: metal feet chrome or painted finish.

Cushions: feather.

Upholstery: removable cover.

Base

T23 Polished Chromed

Materials informations

Poplar plywood 25% Metal components 20% Upholstery 20% Polyurethane foam 15%

Polyurethane

Flexible expanded polyurethane is a solid Wood is a renewable raw material. elastic polymeric material with open cell structure. It is a non-toxic material and above all free from ozone-damaging components. Production and processing of the polyurethane we use meet the objectives of the new policy of ensuring the protection of human health and of the environment. We focus in particular on the choice and use of the types of density of polyurethane suitable for preserving over the years the features of load capacity, elasticity and resilience. For products used in public spaces flame-retardant expanded polyurethane is chosen, tested and certified according to international regulations.

Marble

Marble is a natural material obtained through a metamorphic process from sedimentary rock ouch as limestone or dolomite, causing crystallisation of the calcium carbonate. The specific features of the material can be seen in the marble we use which is worked by artisans with machinery and polished with natural waxes which go to respect the actual essence of the nature of the marble.

Wood

All products derived from wood, such as for example plywood, have the advantage of being able to be machined more easily than wood and do not deform. The timber we use – solid or plywood - comes mainly from European and Russian forests and is seasoned to specific values of humidity with tests. Most of the structures of the products in the collection have a frame in solid pine or ash, or in beech or poplar plywood.

Metal

The need to combine complex yet lightweight shapes with resistant materials necessarily involves the use of metals ouch as steel and aluminium. products in polyurethane foam are made with an inner steel frame for adding strength to the structure. The bases are in tubular metal which can be chromed with a gloss or satin finish or painted with epoxy powders.

Recyclability

All Quilt elements are 100% recyclable when fully separated. Tacchini undertakes on-going research and development, with efforts made to introduce products which are a perfect combination of function and safety without jeopardizing the final design of the same articles. During production attempts are made to minimize noise and emission levels and to reduce rejects as far as possible. All the single materials which make up the production process, once disassembled, can be reused several times, maintaining a high quality

Packaging

Quilt element is dispatched already assembled. It is protected by tissue paper and cellophane to protect the covering from dust and direct contact with the cardboard. The product is packed in rigid cardboard boxes suitable for world export. Manufacture of the packaging observes the criteria for recovery both as recycling and energy recovery and composting.

Once a product reaches the end of its life cycle it has to be eliminated. To discover more about Tacchini environmental policy please visit: www.tacchini.it

Pearson Lloyd

Pearson Lloyd is one of the leading names in contemporary British design, and this multidisciplinary studio works in a wide range of sectors: from furnishing to public spaces to brand development. Established by Luke Pearson and Tom Lloyd in 1997, the studio has received numerous acknowledgements and accolades in both Europe and the United States. The British design duo write regularly for major design magazines, as well as acting as "visiting lecturers" at the École Cantonale d'Art in Lausanne.

Selected projects:

Fraser Suites (Geneva, Switzerland)

Okko Hotel Grenoble (Grenoble, France)

Okko Hotel Nantes (Nantes, France)

King Abdullah Sports City (Dubai, United Arab Emirates)

Okko Hotel Lyon (Lyon, France)
