

Split

Designer: Claesson Koivisto Rune
Year: 2007

All-important and necessary accessories, Split coffee and side/occasional tables fit right into everyday life and also into the daily grind of contract settings: beauty and function in perfect harmony. Designed by Claesson Koivisto Rune, the Split collection includes round, oval, rectangular and square tables in different heights and sizes. The distinctive, streamlined, light metal base is powder-coated and comes in several colors. It features modern vertical geometric lines and supports the marble top, available with stain-proof sealant, or in 19 mm thick lacquered MDF.

Materials informations

Marble

Marble is a natural material obtained through a metamorphic process from sedimentary rock such as limestone or dolomite, causing crystallisation of the calcium carbonate. The specific features of the material can be seen in the marble we use which is worked by artisans with machinery and polished with natural waxes which go to respect the actual essence of the nature of the marble.

Metal

The need to combine complex yet lightweight shapes with resistant materials necessarily involves the use of metals such as steel and aluminium. products in polyurethane foam are made with an inner steel frame for adding strength to the structure. The bases are in tubular metal which can be chromed with a gloss or satin finish or painted with epoxy powders.

Metal	50%
Top table (laminated, marble, lacquered MDF)	50%

Recyclability

All Split elements are 100% recyclable when fully separated. Tacchini undertakes on-going research and development, with efforts made to introduce products which are a perfect combination of function and safety without jeopardizing the final design of the same articles. During production attempts are made to minimize noise and emission levels and to reduce rejects as far as possible. All the single materials which make up the production process, once disassembled, can be reused several times, maintaining a high quality standard.

Packaging

Split element is dispatched already assembled. It is protected by tissue paper and cellophane to protect the covering from dust and direct contact with the cardboard. The product is packed in rigid cardboard boxes suitable for world export. Manufacture of the packaging observes the criteria for recovery both as recycling and energy recovery and composting.

Once a product reaches the end of its life cycle it has to be eliminated.

Claesson Koivisto Rune

The Claesson Koivisto Rune studio was established in 1995 as a multidisciplinary architecture and design workshop, in line with the classic Scandinavian tradition, but with the aim of exploring new concepts, and pursuing the values of simplicity and innovation. The three Swedes have created architectural designs throughout the world and in every sector, from homes to restaurants, retail to executive buildings, as well as furniture ranges for numerous major international firms.

Selected projects:

Marktgasse Hotel
(Zurich, Switzerland)

Skeppsholmen Hotel
(Stockholm, Sweden)

COB
(Meda, Italy)
