BOVILIS® CORONAVIRUS

Intervet/Merck Animal Health

Bovine Coronavirus Vaccine

Modified Live Virus

Cattle Vaccine

For Intranasal Use

This product has been shown effective for the vaccination of healthy cattle 3 days of age or older against enteric disease caused by bovine coronavirus. Duration of immunity has not been established. For more information regarding efficacy and safety data, go to productdata.aphis.usda.gov. This product has been shown safe in cattle 1 day of age or older.

Directions: Using sterile syringe and needle, aseptically transfer contents of the enclosed diluent vial into the vaccine vial. Shake well and administer a single 2.0 mL dose intranasally. For advice on revaccination frequency, contact your veterinarian.

FOR INTRANASAL USE ONLY

FOR ANIMAL USE ONLY

Caution: Store at 2°-8°C (35°-46°F). Do not freeze. Use entire contents when first opened. Do not mix with other products, except as specified on the label. Inactivate unused contents before disposal. Do not use chemical disinfectants to sterilize syringes or needles. Do not vaccinate within 21 days before slaughter. This product has not been tested in pregnant animals. If allergic reaction occurs, treat with epinephrine. Contains Penicillin and Streptomycin as preservatives. In case of human exposure, contact a physician.
