

The **ONLY** USDA-approved bacterin
as an aid in the reduction of both
RESPIRATORY DISEASE & ARTHRITIS
caused by M. bovis
...and with just ONE dose.

Introducing...

the **ONE**
and **ONLY**

Mycoplasma bovis bacterin
Myco-B ONE DOSE™

American Animal Health, Inc.
Grand Prairie, TX 75052
U.S. Vet License No. 315

10 REASONS TO MAKE THE SWITCH TO Myco-B ONE DOSE™

COVERAGE WITH JUST ONE DOSE

- 1 No Booster Doses Required
- 2 Convenient SUBQ Administration
- 3 Broad spectrum coverage with 3 especially selected field isolates
- 4 USDA-approved for RESPIRATORY & ARTHRITIS coverage from *M. bovis infections*
- 5 Stimulates strong immune responses with improved *LIFE IV* adjuvant technology
- 6 Safe for use in cattle as young as 60 days of age

SAVES TIME & MONEY OVER MULTI-DOSE PRODUCTS

- 7 Reduces labor costs & potential injury
- 8 Reduces secondary handling & extra stress on animals
- 9 Reduces inventory costs & refrigerated storage needs
- 10 Reduces extra cost of 2nd or 3rd booster dose

Features that benefit you & your cattle!

Broader Coverage * More Potent Adjuvant * One Dose Administration

10 dose (20mL) bottles 24/case
50 dose (100mL) bottles 12/case
