

# pediped® SIZING GUIDE

## WARNING!

FOR ACCURACY THIS PAGE MUST BE PRINTED TO THE CORRECT SCALE.

When printing, set your page scaling to: None

### How to use the chart:

- Match the size of a credit card or quarter to the corresponding graphics at the bottom of the chart or measure with a ruler along left edge of chart. **If none of those options match with your printed chart, you will need to reprint with the correct settings.**
- Place "heel" edge of chart against a wall.
- Tape chart to floor for added stability.
- Place heel at the bottom edge of the chart.
- Child must be standing, with toes resting flat.
- Measure to the longest toe.
- For baby sizing, use the purple section to the left.

**Note: Measure both the right and left foot for accuracy. When ordering, use the largest of the 2 dimensions.**

For in between sizes, select *Flex*® styles come with the *Flex Fit System*™. These insoles can reduce a shoe size by almost half a size. Check product pages to see if shoes run large or small.

If you have any questions, please email [customerservice@pediped.com](mailto:customerservice@pediped.com) or call 702-567-0311
