4	6		How did he know about me? I have no idea. <u>Had she mentioned my name to her husband, as an old boyfriend?</u> But why? And how did he know my phone number (which was unlisted)? In the first place, why me? Why would her husband go to the trouble of calling me to let me know his wife had died? I couldn't imagine she'd left a request like that in a farewell note.	How did he know about me? I have no idea. <u>Had she mentioned my name to her husband, as an old boyfriend?</u> But why? And how did he know my phone number (which was unlisted)? In the first place, why me? Why would her husband go to the trouble of calling me to let me know his wife had died? I couldn't imagine she'd left a request like that in a farewell note.
4	3		Which choice completes the text with the most logical and precise word or phrase? A) <u>nterfere with</u> B) conform to C) atone for D) taper off	Which choice completes the text with the most logical and precise word or phrase? A) interfere with B) conform to C) atone for D) taper off
21	8		During the Great Plague of 1665 in the UK, all dogs and cats were ordered to be killed to halt the spread of the bubonic plague. However, as society began to value pet ownership and sentimentality increased, people began questioning the necessity and morality of culling directives for disease control, particularly among dog owners. <u>Nevertheless, throughout history, culling was a crucial tool in controlling outbreaks of animal diseases in the UK and is still used to control many livestock diseases today.</u>	During the Great Plague of 1665 in the UK, all dogs and cats were ordered to be killed to halt the spread of the bubonic plague. 33	Error in the book		<ul style="list-style-type: none"> It is widely believed that fungi can store carbon since fungi transport carbon from the air into the soil. An international team of scientists examined the results of hundreds of studies looking at plant-soil processes to analyze how much carbon is being stored by fungi globally. The scientists estimated that a total of 13.12 gigatons of CO₂ is being stored by the fungi in the soil. The 13.12 gigatons of CO₂ is equivalent to about 36 percent of annual global fossil fuel emissions. In a following study, the scientists are now investigating how long the carbon is stored by the fungi in the soil. 	
	Corrected		<ul style="list-style-type: none"> The price per gram of ceremonial grade matcha is the highest of all types of matcha. Ceremonial grade matcha is bright green in color and has the consistency of a fine powder. Premium grade matcha is slightly more bitter than ceremonial grade matcha. Culinary grade matcha is used as an ingredient in cooking, baking, and beverages. Typically, ceremonial grade matcha comes from the first harvest of tea, premium grade matcha is derived from the second harvest, and culinary grade matcha is taken from the third harvest.
