

MAGNEPAN TERMINOLOGY DIAGRAM

EXAMPLE TWO-WAY SPEAKER

This diagram is intended to depict and name the significant parts of a Magneplanar two-way speaker. Magnepan has been manufacturing two-way speakers, among other products, for over fifty years—as such there are many different models, varieties, shapes, and sizes. This diagram is meant to serve as a general example of this kind of speaker, not necessarily a 100% accurate portrayal. Some features of certain models may be similar, but different.
