

INSTRUCTIONS

IN THE BOX:	
①	Trigger Handle
②	Filter Pleat Fan Spray Head with attached tube
③	Filter Core 360° Spray Head
④	Extension Tube for filter core spray head

Jet Stream Filter Cleaning System utilizes a Trigger Handle with water pressure dial, which attaches to your garden hose. Features two interchangeable spray heads. The Fan Spray attachment separates and cleans the filter cartridge exterior pleats. The cylindrical 360° Spray attachment with long-reach extension tube cleans the filter's interior core.

ASSEMBLE 360° SPRAY ATTACHMENT:

Insert long Extension Tube ④ (end with black nut) into the 360° Spray Head ③ while aligning the tube's slot with the key tab inside. Firmly hand-tighten black nut.

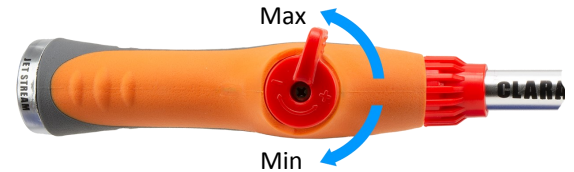

HEAD ATTACHMENT:

Insert the Fan Head or 360° Head into Trigger Handle, aligning the tube's slot with the key tab inside. Firmly hand-tighten the red nut.

PRESSURE ADJUSTMENT:

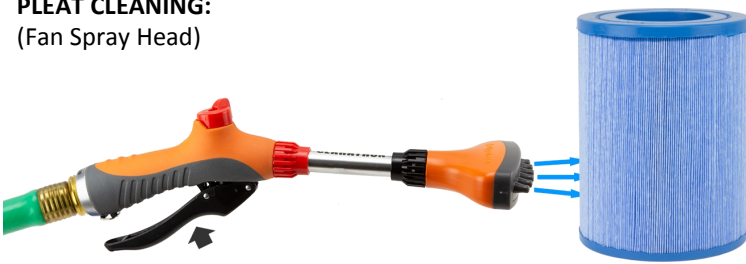

The red dial controls Jet Stream water pressure. Start with maximum force by turning the knob fully counter-clockwise.

FILTER CLEANING PROCEDURE:

1. Spray pleats with Fan Head attachment to remove loose debris.
2. Apply non-foaming cleaner such as ecoTUB Instant Filter Spray to pleats and inside core. Alternately, soak cartridge for 1 hour or overnight in a plastic bucket using Power Soak, or ecoTUB Filter Soak cleaning compound per product directions.
3. Thoroughly rinse filter pleats using Fan Head attachment. Press Jet Stream nozzles into pleats for deep cleaning.
4. Remove Fan Head attachment and attach the 360° Spray Head.
5. Insert 360° Head into filter cartridge core, moving up and down. Flip taller cartridges if necessary for complete coverage.

PLEAT CLEANING: (Fan Spray Head)

Deep-cleaning jet nozzles

CORE CLEANING: (360° Spray Head)
