

## The Ultimate Spa Experience

Improving your spa experience with mineral technology that not only makes your spa sparkle like never before it feels better and provides a healthier bathing environment for you and your family.

### AMAZING FORMULA

PoolRx contains a proprietary blend of minerals that continuously and effectively eliminate algae for up to 6 months. The specially treated alloy cylinder is packed with minerals that dissolve immediately to form a stable residual in the water. The minerals eliminate algae while freeing up low levels of chlorine to be more productive in the water. During the filtration process the minerals are rejuvenated as they return and pass through the cylinder. PoolRx works synergistically with a constant low level of chlorine. (0.5-1.0 ppm) for residential and (1.5-2.0 ppm) for commercial.

## The best kept secret for a sparkling clear spa!

PoolRx is the only eco-friendly solution that simplifies pool care, dramatically reduces chemical usage and lowers your overall cost of maintenance.

### TESTIMONIALS

*"When I switched to SpaRx. I couldn't believe the quality of my spa water, no more chemical smell and my skin was not dried out like it used to be. The water clarity is so much better too. I used to use my spa once a month now I am in it at best two times a week"*

- Mary, Mission Viejo, CA

*"I have never has such a hassle free spa. My hot tub is clean and fresh with very little time. The water is cleaner and clearer than it's ever been"*

- Chris, Laguna Beach, CA

*"I have used your products and haven't had to add any additional products to my hottub. Your products have kept my hot tub clear and clean. As well, I have saved money by not having to buy all those different water products."*

- Lisa, Cedar Hills, UT
