

Sustainable Gift Wrapping

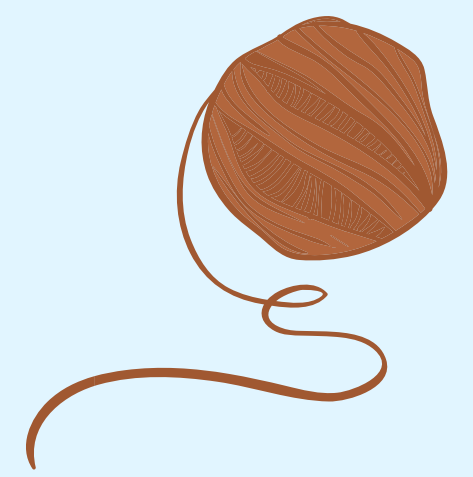

Materials Needed:

- Twine
- Brown Paper
- Fabric Scraps
- Newspaper
- Natural Decorations

Step 1 - Pick which present you would like to wrap.

Step 2 - Lay the gift on your chosen wrapping paper and measure. Practice folding the paper to ensure it covers the gift.

Step 3 - Now's the tricky part! Fold the paper or fabric tightly and measure your twine. Make sure it fits!

Step 4 - Tie the twine tightly to keep the paper in place. You might want to intertwine twigs/natural decorations to make your gift look extra special.

Think about all those birthdays and Christmases with gifts wrapped in non-recyclable paper. Let's get creative and make a change!

Step 5 - Be proud! You have helped the environment by using an eco-friendly alternative to wrapping paper. Well done!
