

# XEBEC

## New Zealand's Favourite Tri-Screen

The Xebec Tri-Screen is a portable dual monitor setup that fits over the top of your existing laptop. It couldn't be simpler to use. It is lightweight and highly portable and the latest go-to for busy professionals. Set up and pack down in seconds, and enjoy the convenience of a modern office setup, wherever you are.

Dual screens have never been more portable and user-friendly than Xebec.

## NEW PRODUCT INTRODUCTORY PRICE

- Expand your laptop from a single screen to a triple screen with all the portability of your laptop.
- Multi-screens are the new norm in our offices at work and at home.
- Now take that versatility with you when you travel on your sales calls or to your meetings with full HD clarity.
- Buy confidently from a NZ business who stocks the product on-shore and backs the product with after sales support if required.
- Your laptop will require two USB-C Thunderbolt ports OR two standard USB-C ports + two HDMI ports to accommodate the Tri-screen
- If your laptop is not configured this way you will need the Xebec adaptor which you can order separately.

## Features & Benefits

- Works on almost ANY laptop: universal attachment makes it simple to attach to any laptop.
- Boost productivity by more than 35%: multiple screens are proven to increase productivity.
- Instant setup & no installation: get up and running in less than 30 seconds.
- Extremely compact & portable: so slim it can stay on your laptop even when you aren't using it.
- Remarkably lightweight at only 910 grams: it weighs less than half of a standard laptop.
- Compatible with every OS: No matter the OS you run, it's compatible. (Mac, Windows, Linux, Chrome, etc.)

# SMART OFFICE TECH

# DO I NEED THE TRI-SCREEN ADAPTER?

*\*\*All M1 MacBook Pro and Air laptops require the Tri-Screen Adapter. The new M1 Pro and M1 Max MacBooks DO NOT\*\**

Laptops with one (or no) video ports will require the Tri-Screen Adapter for full functionality. See our handy reference chart below!

The Tri-Screen 2 requires **TWO** video capable ports:

Laptop Ports	Adapter Required
 USB-C x 2 <i>(DisplayPort or Thunderbolt 3/4)</i>	<b>No</b>
 HDMI x 2	<b>No*</b>
 HDMI + USB-C <i>(DisplayPort or Thunderbolt 3/4)</i>	<b>No*</b>
 USB-C x 1 <i>(DisplayPort or Thunderbolt 3/4)</i>	<b>Yes</b>
 HDMI x 1	<b>Yes</b>
 USB-A	<b>Yes</b>

*\* - while the Tri-Screen Adapter isn't required when your laptop has HDMI ports we recommend using it for a more streamlined setup*
