

IONION MX

TRUSTLEX

**Emits about 690,000 negative ions
per cubic centimeter.
New and more powerful IONION MX!**

About 180,000 units have been sold since its
release ! Purchased by the persons below.

Ultra-small negative ion generator

Recommendation

Blue Clinic Aoyama
Director of Naito General Medical Center
Mareo Naito, M.D.

I am an IONION MX user. I was amazed how effective
the IONION MX was as a fast-acting remedy for hay
fever, from which I have suffered for a long time.

I recommend IONION to all my patients as well as our staff at my clinic.

《 Blue Clinic Aoyama 》

My clinic aims at producing the optimal effect through a combination of
several benign treatment methods such as special diets, supplement
regimens, infusions, deep thermotherapy, bioresonance therapy,
aromatherapy, radiation hormesis, and hydrogen therapy.

We work together with our patients and their families to focus on the
treatment that is of the highest priority in each case.

IONION MX IONION MX

NEW STRAP
(MADE IN JAPAN)

Chemicals and other substances such as dust, viruses, pollens, and fine particles (PM2.5) floating in the air are positively charged. People also tend to be positively charged in the modern lifestyles they lead surrounded by electrical appliances and synthetic fibers. Such chemicals and other substances are in a suspended state all the time. As a result, we live in an environment where we liable to breathe in such substances. The primary function of general negative ion generators sold on the market is to neutralize this positive charge only. On the other hand, the IONION MX is an ultra-small negative ion generator that can protect users from chemicals and other substances by wrapping their bodies in an ion barrier, using patented technology that negatively charges the surface of the body.

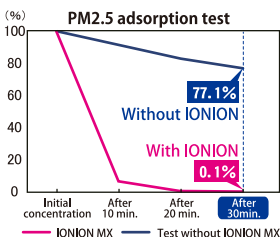

Negative ions are continuously discharged from upper end of this unit.

MORE POWERFUL! Generates 3.6x more negative ions than the previous model!
Emits about 690,000 negative ions per cubic centimeter. No hazardous ozone output.

Some types of negative ion generators produce ozone. The IONION MX, on the other hand, does not generate any hazardous ozone.* This product is safe for anyone, from children to the elderly, to use.

*The measurement result of the ozone output is less than 1/100th (0.001 ppm) of the safety standard value stipulated by the Ministry of Health, Labour and Welfare of Japan.

99.9% PM2.5 removal performance!

TComparison (with/without IONION MX) and verification tests were conducted on the decrease in PM2.5 fine particle concentration by placing approximately 52,400 particles/cc in a 60-liter box. The tests were conducted by the Far Infrared Association.

Result ● Without IONION MX : Remaining quantity of PM2.5 **77.1%**
● With IONION MX : Remaining quantity of PM2.5 **0.1%**

The test result revealed that the IONION MX decomposed and absorbed 99.9% of the fine particles (PM2.5) when it was operated in a confined space.

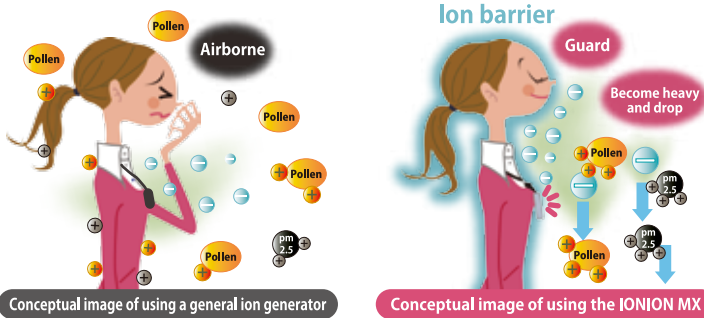

Patent No. 5062706

Patented ion power metal!

This unique feature is provided on the back of the IONION MX. Small metallic chip: This ion power metal is a patented technology that amplifies the amount of ion emission and wraps an ion barrier around you by infusing your body with negatively charged ions when you wear IONION. This technology drastically improves the effect when you wear the IONION MX.

[How the ion barrier works]

- The ion barrier makes it possible for airborne substances within breathing range to become negatively charged more easily. Since negatively charged airborne substances become heavier and drop to the ground, they are no longer inhaled through the nostrils like before.

Conceptual image of using a general ion generator

Conceptual image of using the IONION MX

- It is reported that negative ions accelerate the metabolism of a hormone in the brain called serotonin*. Negative ions encourage the body to enter a relaxed state (parasympathetic dominance). The ion barrier brings out the above effect to a maximum and evokes the sensation of being wrapped with negative ions.

*Serotonin suppresses sympathetic nerves that become active due to stress, staying up late, or electromagnetic fields. It is very effective towards controlling autonomic nervous system disorders that are considered to be a cause of allergies.

Actual size

Ion Certification Mark

Ultra-small and lightweight (20g)!

The IONION MX is so light and small that you will hardly be aware of even when you are wearing it around your neck or have it on yourself.

You can also put the IONION MX in your pocket to use it.

Charging the unit over USB

An AC adapter with USB cable is included with the IONION MX so that you can charge the unit from your computer.

Class 5 ion emission

The IONION MX is Class 5 certified in ion emission by the Japan Association of Ion Research & Application (JAIRA). JAIRA is a non-profit organization established in 2001 based on the premise that accurate measurement of ions will back up the ion industry. Owing to the significant efforts made by JAIRA, Japan has established the world's first ion measurement standards (JIS). JAIRA conducts measurement tests based on JIS-B9929 and has certified the IONION MX as a highly-reliable ion generation product.

All product packages of the IONION MX bear the "Ion Certification Mark."

Measuring test results of other manufacturers' ion generators

The amount of negative ion emissions of other manufacturers' ion generators was measured and compared by JAIRA. All other manufacturers claim that their products emit more negative ions than the IONION MX. However...

Result

- | | |
|--|---|
| ● Amount of negative ion emission | ● Amount of positive ion emission |
| Highest: IONION MX (690,000 ion/cm³) | Highest: Company S P (73,000 ion/cm ³) |
| 2nd highest: Company S P (76,000 ion/cm ³) | 2nd highest: Company S M (160 ion/cm ³) |
| 3rd highest: Company S M (480 ion/cm ³) | 3rd highest: Company T b (130 ion/cm ³) |
| Lowest: Company T b (100 ion/cm ³) | Lowest: IONION MX (0 clon/cm³) |

Second series of IONION for the car

New!

Comfort driving surrounded by negative ion

CAR IONION

Coming soon
14,800 yen (Excluding tax)

Product specifications

- Product name : IONION MX
- Material of main body : ABS resin
- Color : Champagne gold
- Dimensions of main body : 65mm (H) x 25mm (W) x 16mm (D)
- Weight of main body : Approx. 20g (including the supplied rechargeable battery)
- Power supply : Lithium battery, AC/DC adapter
- Ion generation indicator : LED light
- Operating environment : Temperature 0°C to 40°C, Humidity 30 to 70%
- Amount of negative ion emission : Approx. 690,000ion/cm³
(Measured by the Japan Association of Ion Research & Application)
- Accessories : AC adapter (supplied with dedicated USB cable), Nylon strap, Operating instructions
- Warranty : One year after your purchase only in Japan.
