

IONJOY

negative ion generator + uv-c

Tabletop Negative Ion Generator

Relaxing comfort and health benefits in any room

IONJOY is a tabletop negative ion generator that produces a high concentration stream of healthy negative ions.

IONJOY

32,000 ^{Excl. tax} yen (Made in Japan)

Kills germs and viruses with UV-C

4 built-in LEDs for emitting 280 nm UV-C

Ultraviolet light has a wavelength of 100–400 nm and is invisible to the eye. That known as “near ultraviolet light” (UV-C) has a wavelength of 100–280 nm. Though it does not exist on Earth, UV-C can break apart the double helix DNA of many strains of bacteria and viruses. This strong antibacterial efficacy can be used as a powerful disinfectant.

Concentrated stream of negative ions equal to 1.1 million ions/cm³

Measured and certified by the Japan Association of Ion Research and Application

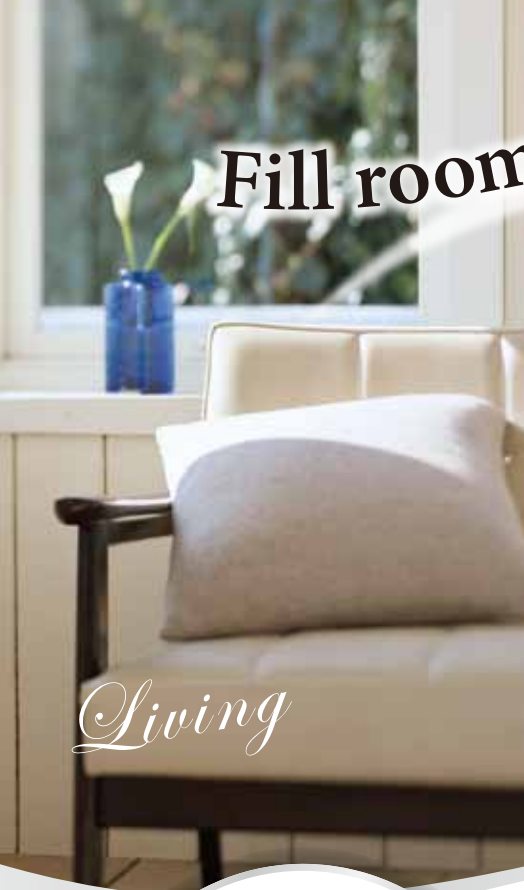

Negative ions selectively target and act on the parasympathetic nervous system (PNS). PNS is dominant when people physically rest and relax. In that state, body temperature rises, breathing becomes deeper and blood flow improves, which increases the number of lymphocytes in the bloodstream and boosts the immune system. The IONJOY achieved the highest possible Class 6 ranking for the quantity of negative ions produced, in measurements conducted according to JIS standards by the Japan Association of Ion Research and Application.

Fill rooms where you like to relax
with negative ions.

Living

Bedroom

Toilet

PM2.5 Removal 96.9%

Results from PM2.5 removal tests conducted by the Far Infrared Association showed the IONJOY removed 96.9% of airborne pollen and house dust.

Deodorizing Effect 83.3%

In ammonia deodorizing tests conducted by the Hygiene and Microbiology Research Center, the IONJOY was found to remove 83.3% of pet and room odors.

Ozone-Free

The IONJOY does not generate or release harmful ozone. This means no offensive odors associated with ozone either. Measurement results came in below the 1/100 (0.001 pm) safety regulation of the Ministry of Health, Labour and Welfare.

I strongly recommend the IONJOY.

Since I placed the IONJOY on the headboard of my bed, I've slept peacefully as if I were next to a small waterfall in a forest. It produces an effect you don't get with plain humidifiers.

Naito Clinic Dr. Mareo Naito MD

ION JOY
negative ion generator + uv-c

Product Specifications

- Product: Tabletop Negative Ion Generator
- Name: IONJOY
- Dimensions: H120 × W100 × D98.7 mm
- Weight: 240 g
- Negative ions emitted: 1,100,000 ions/cm³
- Material: ABS resin
- Color: Metallic black
- Power supply: IN: 100-240V, OUT: 5V at 1A
- Ion generation method: Electron radiation
- UV-C emission method: 280 nm round LED × 4
- Working temperature: 0-45°C
- Accessories: Power adapter, USB cable
- Price: ¥32,000 (Excl. tax)

WARNING: Do not look directly into the near ultraviolet light emitted by the UV-C LEDs.

Easy to Clean

- ① The lid detaches for easy cleaning.
- ② A sea sponge filter is installed inside the IONJOY to prevent dust from penetrating the product.
