

HORMES JELL

SALON DE TERA

Terahertz powder

Hormesis powder 1.5-fold

A cream that vibrates one trillion times each second

Vibrates 1 trillion times^{second}

Terahertz powder Thermal diffusivity and resonance are high

Salon De Tera contains artificial ore powder that emits terahertz wavelengths.

The wavelength of terahertz is an extraordinary wave that vibrates 1 trillion times (1 tera) per second.

This is a special ore that has the properties of both radio waves and light waves.

Its wavelength is longer than that of far-infrared rays, so it easily penetrates deep within the body, and its main characteristics are high thermal diffusivity and high resonance.

Like far infrared rays, terahertz waves are not visible, and they have a frequency of 0.3-10 THz and a wavelength of 1000-30 μm . Since they are difficult to produce, they were not well known until now, but due to technological progress in recent years, research has become active, with applications to various fields such as basic research, ultra-high-speed communication, the environment, and biotechnology being considered.

Promotes cell activity

Hormesis powder 1.5 times the conventional product!

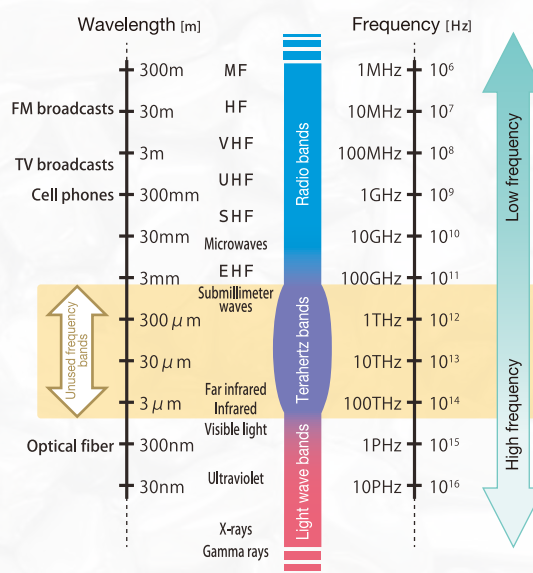

It contains about 1.5 times more negative ion (hormesis) powder than Hormes Jell. It continues to generate more than 1,500 negative ions per cubic centimeter.

* Measured with EB-17 ion counter

It also contains many luxurious extracts that can be used on the whole body.

- Superior moisturizing effect
Phytosteryl macadamiate
- Anti-melanin effect by inhibiting tyrosinase activity
Mulberry bark extract
- Gives the skin tension and elasticity
Panax ginseng extract
- Very calming effect
Rosemary oil

<Ingredients> Water, isopropyl palmitate, zirconium oxide, BG, ethanol, glycerin, dimethicone, polyacrylamide, hydrogenated polyisobutene, phytosteryl macadamiate, morus alba root extract, Panax ginseng extract, licorice root extract, rosemary leaf oil, laureth-7, silica, phenoxyethanol
* Since it contains abundant ceramic powder, rubbing it strongly can make it grainy. It can be used for scrubbing tool by utilizing the graininess. Also, since terahertz powder is an alloy color, it may stain light gray if it gets on clothing.

<Net weight> 120 g <Accessories> Inner lid/spatula

Recommended for these people at such times

When you feel tired from standing work or muscle pain

Where you feel stiff shoulders or coldness

Before and after a massage, and before going to bed

For areas that show aging such as spots and wrinkles

Before swelling or fatigue in places prone to them
