Products -Greenflow Cork Flooring

Wood Digital Visual

100% solid cork core
click system

Design

Unlimited realistic visuals, textures and colours, allied with the possibility of customization. Can also be digitally printed on Greenflow Cork, with the highest resolution -1000 dpi -using innovative technology.

Solid Cork Core made with a revolutionary new technology by creating an engineered compressed cork core, which is completely stable and allows **Green Flow** to be installed in any residential or commercial projects. It comes with an incorporated high performance cork underlay membrane which enhances comfort and sound insulation.

Comfort

Walking on our floors cannot be paralleled in terms of comfort. Greenflow Cork's elasticity protects against walking impacts and relieves strain on your feet, joints and back.

Products -Greenflow Cork Flooring

Waterproof

Will not warp or buckle, even in submerged waterbased on tests according to EN.

mHe3avy density > 950kgs/

Eliminates ripples and waves caused by uneven subfloors.

Ideal for large commercial area installation

Up to 300m / 3200ft without any transitions.

Quiet

The unique structure of cork makes all our floors particularly quiet. Cork reduces sound transmission between and within rooms, creating a quieter and more peaceful environment in your home.

Warmth

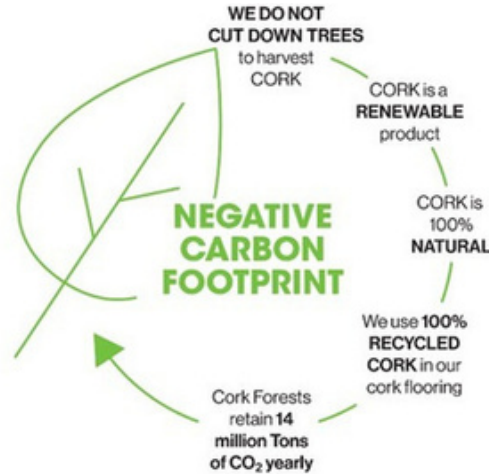

Greenflow Cork's natural thermal insulation properties make our floors pleasantly warm. They provide a warm and cozy floor temperature even for bare feet, as well as a high level of comfort all year round.

Indoor Air Quality

100% NATURAL CORK FLOORING

Products -Greenflow Cork Flooring

Sustainable Option

Nothing is wasted, everything is reused

Opus Greenflow series is an outstanding **ecological material**, able to retain CO₂ to a considerable level. The Portuguese Cork Oak Tree –QUERCUS SUBER L –forests retain approx. 14 million tons of CO₂ yearly. Not a **single tree** is cut or damaged during the harvesting.

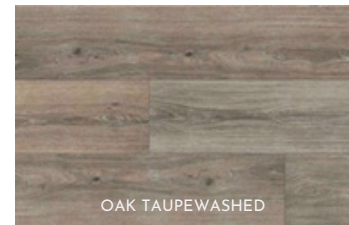

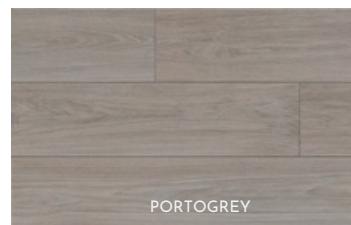

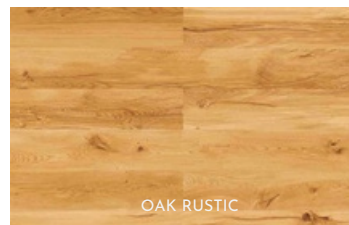

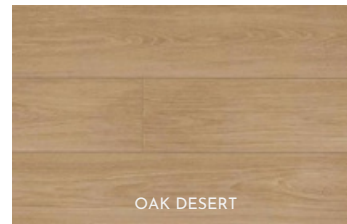

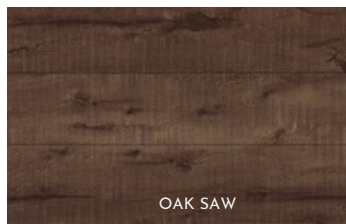

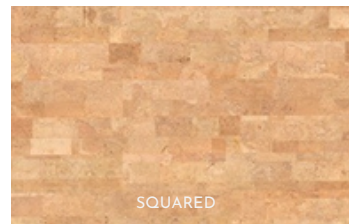

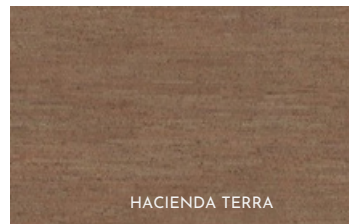

Our Greenflowseries floors are produced from **100% pure natural cork** materials, from corks trees that are never cut down, meaning the cork trees will remain a carbon sink for their lifetime. This contributes for a **negative carbon footprint**, reducing global warming and improving the general sustainability of our planet.

Opus is fully aware of the importance of protecting our environment,Opus GreenflowCork is definitely the most sensible and ecological choice.
