

ALLERGEN INFORMATION CHART

Major Food Allergens, as defined by FDA, includes: eggs, fish, milk, peanuts, shellfish, soy, tree nuts, and wheat. In addition to FDA Major Food Allergens, we disclose the presence of gluten, mustard, sesame, and sulfites, which are considered allergens by other regulators. When allergens are present at a facility, Banza manufacturing partners sanitize and test each manufacturing line between production runs to ensure our products do not come into contact with allergens. We recommend consulting your allergist before introducing Banza if you have any questions about the allergen information shared below.
