- Genuine Weighted Stone Bath
- Excellent Heat Retention

- Available in Matt or Gloss finish
- Any Custom colour can be added in Matt or Gloss as custom

# STONE BATH SERIES

For centuries artists have treasured white marble as the most luxurious and elegant of stones. It's lorefractive index allows light to penetrate the surface, bringing dectan 'life' to sculptures. Nature transforms limestone into marble by meta-morphing the structure of the minerals into an interlocking mosaic of calcite crystals.

Using specialised technologies and craftsman, Moda has been able to replicate the properties of Isotropic Calcite (white marble). Isostone™ is a carefully mixed composite of Limestone (70%) interlaced with complex resins. The result is a solid material, with a smooth and silky matt finish that is every bit as beautiful as sculpted marble.

## LUCIA

# ACRYLIC BATH SERIES

Moda & ACS Designer Bathrooms are proud to present the first matte acrylic bath range to the international market. We understand that some customers desire the look of stone in their new bathrooms, but are limited by issues of bath weight and structural integrity. Now, there is another way. Designers dream of a material such as acrylic. The reason is that it takes on any shape imaginable. It feels smooth and supple and always pleasantly warm on the skin. Moda freestanding baths are an elegant and luxurious bathroom centrepiece and feature inspirational design and beauty combine with modern day practicality and use. They are constructed of 8 mm thick heavy gauge cast sanitary grade acrylic with a built in base frame, adjustable metal legs and pop a up waste. This extra thickness ensures a solid feel and excellent heat retention. With an appearance and feel of stone, but a weight of dense cast acrylic, this may be the solution you've been looking for.
