CERAMIC BEAD BOOSTER

MP-02

ULTRA CONCENTRATE - CERAMIC DRYING AGENT

Mothers® Automated Solutions™ Ceramic Bead Booster is a ceramic infused drying agent that provides the benefits of sheeting and rapid beading in perfect balance thanks to the use of our extremely hydrophobic polymers. This formula is one that stacks over time and with each application you will find even more intense water behavior and rapid repellency all at extremely low usage rates. With just a couple milliliters per

application, you will cause water to shed at rates faster than ever before thanks to this unique formula that increases the surface tension so much that water just cannot hang on. The more times you use it, the better it gets and your customers will revel in its on-going effectiveness each time they come back to your wash. Give them something no one else can by giving them the **Mothers® Automated Solutions™ Ceramic System**.

ADVANTAGES

- ◇ Perfect balance of sheeting and rapid beading
- ◇ Extremely low usage rates
- ◇ Stacks over time to make surface easier to dry
- ◇ Compatible with Friction, Touch-Free or Self-Serve applications

DIRECTIONS FOR USE:

- ◇ Rain Bar: 2-3 mL at up to 3000:1
- ◇ Adjust dilution until desired performance achieved
- ◇ Can be aerated with a small amount of air pressure
- ◇ Overuse of product may result in less effective drying

ADDITIONAL INFORMATION:

Specific Gravity:	0.98	Available Colors:	Colorless
pH of Concentrate:	5-7	Scent:	Unscented
Recommended Dilution:	Up to 3000:1	Foam Profile:	None
Reclaim Compatible:	Yes	Wash Types:	Friction, Touch-Free, Self-Serve
Does Not Contain:	Solvents, Phosphates or APE/NPE/OPE Surfactants	Safety/Cautions:	Refer to SDS Sheet for all safety, hazard and first aid information.

*USAGE RATES VARY BASED ON GPM VOLUME AND TYPE OF APPLICATOR USED
