

Hobart

SCUFF 392601

The Hobart Scuff is a 145mm, men's elastic-sided, pull-on ankle boot with a Scuff Cap to increase the longevity of your boots.

Description

145mm, men's elastic-sided, pull-on ankle boot.

Upper Materials

Cowhide water-resistant nubuck leather upper and double stitched in nylon thread.

Toe Cap

200J Safety Steel.

Lining Materials

This boot is lined with a soft, non-abrasive, hydrophobic material that wicks perspiration away from the foot, enabling the skin to remain cool and dry. Fresche® Bioscience is applied during manufacturing to provide antibacterial and antimicrobial protection.

Full Innersole

A full length footbed that is inserted into the footwear to offer additional support and comfort. This footbed is made from soft polyurethane that will retain its shape and thickness throughout the life of the boot.

Insole

Heavy-duty, flexible, anti-bacterial non-woven insole.

Midsole

Directly moulded polyurethane midsole for greater shock absorption. Penetration resistant midsole reduces chance of sharp objects piercing the sole.

Outsole

Antistatic Thermoplastic Urethane (TPU) outsole for superior wear properties. Heat resistant to 130°C.

Trisole® Comfort Technology

The Steel Blue soling system is a patented three density soling system that offers a high level of comfort, shock absorbency and energy return. The system uses PORON® as energy absorbing pads under the pressure points of the foot to give the wearer superior comfort and offers similar shock absorbency and comfort to sports footwear.

Safety Boot Features

Steel Toe Cap

Scuff Cap

TPU Outsole
