

# Southern Cross Zip GraphTEC™ Scuff S3 399641

## Colours

Black

## Sizes

5 - 14 | Full Sizes

5.5 - 9.5 | Half Sizes

### Description

150mm lace-up ankle boot with scalloped padded collar and tongue, plus PureGRAPH® Graphene Enhanced outsole, quick release side zip and scuff cap.

### Upper Materials

Cowhide water-resistant fullgrain leather and stitched in nylon thread. Non-corrosive lacing.

### Toe Cap

200J Safety Steel.

### Lining Materials

This boot is lined with Baltico®, which is a soft, non-abrasive, hydrophobic material that wicks perspiration away from the foot, enabling the skin to remain cool and dry. Fresche® Bioscience is applied during the manufacturing process to provide antibacterial and antimicrobial protection to the boot. Fresche® Bioscience is a sustainable and renewable resource that prevents odours caused from bacteria and provides long-term protection against bacteria and fungus.

### Full Innersole

A full length footbed that is inserted into the footwear to offer additional support and comfort. This footbed is made from soft polyurethane that will retain its shape and thickness throughout the life of the boot.

### Insole

Heavy-duty, flexible anti-bacterial non-woven insole.

### Midsole

Directly moulded Polyurethane midsole for greater shock absorption. Penetration resistant midsole reduces chance of sharp objects piercing the sole.

### PureGRAPH® Graphene Enhanced Outsole and Scuff Cap

With the addition of PureGRAPH® Graphene, Steel Blue has enhanced the outsole and scuff caps of our Southern Cross GraphTEC™ Scuff to provide world leading durability and abrasion resistance. PureGRAPH® Graphene has been independently tested, with results showing an increase of over 200% in abrasion resistance for superior durability and additional strength. The antistatic Thermoplastic Urethane (TPU) outsole is heat resistant to 130°C.

### Trisole® Comfort Technology Soling System

The Steel Blue soling system is a patented three density soling system that offers a high level of comfort, shock absorbency and energy return. The system uses PORON® as energy absorbing pads under the pressure points of the foot to give the wearer superior comfort and offers similar shock absorbency and comfort to sports footwear.
