Do stones and crystals have a magical power? Many people are convinced they do and believe they have significant energizing qualities. But to get results you also have to know which crystals to choose and how to make the most of their energy... In this book, Mademoiselle Lili suggests a completely new way to approach the study of crystals: by combining it with astrology!

In fact, crystals are much more than just “rocks”: they vibrate like everything else that makes up our universe. In the first part of the book, you’ll learn that all crystals have a “personality”, depending on how they’re formed, their crystalline system, their chemical characteristics and their colour. By becoming aware of these unique inner qualities and in line with your core personality, linked to your astrological sign (whose specific features you’ll discover in the second part of the book), you’ll be able to use crystals as powerful tools to advance your career and profession, as well as your love affairs and relationships, enhance your inner strengths, or make up for certain shortcomings.

The third part of the book will show you how to maximize the influence of your crystals, in particular by creating a grid filled with good energy and relying on the New Moons. The book concludes with lists of stones and crystals, as well as their characteristics, making the reader’s choice easier when choosing a mineral with a specific intention.
