Following the success of volumes 1 and 2 of *Keep Your Eyes Open*, YouTuber Victoria Charlton is back with a book that is both intriguing and fascinating. In this new book, serial killers, kidnappers, and evildoers of every kind lead us into the mysteries of crime. With her characteristic delicacy and rigour, the author takes the time to speak with the family and friends of some of the victims, thus giving her readers unique perspectives on unresolved cases. Explanatory text boxes describing investigation techniques, as well as the thoughts of a private detective, supplement the text and give even more credibility to Victoria's work. Can you really be kidnapped by aliens or a group of cannibals? Who is the mysterious killer who confessed to murder, live on radio, in the US? You may find out in this book, assuming, of course... you keep your eyes open!
