

HOME GREENHOUSES AND INTERIOR GARDENS (NE)

Simon Chrétien

The complete guide to gardening under cover, rain or shine.

272 pages

March 2022

Éditions de l'Homme

Most plants can be grown in a greenhouse or interior garden. However, to create satisfactory growing conditions, you have to meet the needs of the species being cultivated in terms of light, temperature and humidity. You also have to recognize small insects and big problems! With the help of this book, you'll learn the main principles of growing plants in home greenhouses and interior gardens, with reference to the models available on the market. Whether your projects are modest or large in scale, this is THE reference for achieving good horticultural results indoors!

Strong points

- Great popularity of gardening in recent years.
- Updated content adapted to recent information and technologies.
- Updated photos and a new cover page.
- The author is the distributor for a manufacturer of home greenhouses, so he knows his material and his audience very well.

Subjects : horticulture, gardening, greenhouses, plants

Simon Chrétien is an agronomist and has a masters in plant biology, with a specialization in greenhouse growing. For almost 10 years, he was the director of the experimental greenhouses at a botanical garden. As such, he participated actively in the design and construction of high-performance greenhouses to be used for research and teaching. Passionate about his subject, he is a distributor for a home greenhouse manufacturer in his spare time.
