

STRAIGHT FROM THE SOURCE

The most complete electrolyte mix, naturally.

Oceantrace™ is the result of decades of research and development to produce the world's first Multi Mineral Complex powder made from pure Australian ocean water. It's the synergy of nature, ingenuity, and cutting edge food science. Oceantrace™ helps you hydrate more efficiently and meet daily mineral nutrient requirements, naturally.

PURE OCEAN MINERALS for COMPLETE HYDRATION

Oceantrace™ is a highly concentrated, dissolvable, electrolyte powder, extracted from pure Australian ocean water.

With today's fast-paced lifestyle, and reliance on processed food and beverages, some may find it difficult to quench their thirst, and others may struggle to drink enough. This is because thirst is not simply satisfied by water alone. Our bodies also crave a balance of minerals for sufficient hydration and nutrient requirements. Produced using an intricate and multi-step process, pure Australian ocean water is condensed until it converts from liquid to our super concentrated raw mineral powder. Natural and potent, Oceantrace™

provides a comprehensive range of major and trace minerals, is low in sodium (60mg per serving) and is a good source of Magnesium (165mg per serving). One small scoops dissolved in 500mL of water helps you hydrate more efficiently while also helping you meet your mineral nutrient needs. Hydrating properly will assist in meeting greater energy needs, a more robust immune system, and an improved sense of well-being, so today, and every day, is your best day.

Nutrition Information

When prepared according to directions.
Servings: 10 | Serving Size: 1.4g (1 level scoop, or half tsp)

Avg Qty	Per Serving	%RDI	Per 100mL
Energy	0KJ		0KJ
Protein	0g		0g
Total Fat	0g		0g
- Saturated	0g		0g
Carbohydrates	0g		0g
- Sugars	0g		0g
Magnesium	165mg (6.8mmol)	51%	33mg (1.4mmol)
Sodium	60mg (2.6mmol)		12mg (0.5mmol)
