

24V & 48V CLEAR CASED LEAD-ACID REPLACEMENT SERIES

PRODUCT INTRODUCTION

VoltX 24V & 48V LiFePO4 lithium batteries have been designed with world-leading power technology . Inbuilt prismatic LiFePO4 cells , with better performance , longer life span up to 4000 cycles. You will have an easier build, plug-and-play, less materials, equipment, and a system with unlimited potential to grow by choosing VoltX 24V & 48V Lithium batteries .

Different from a typical battery that stored in a black box, VoltX clear cased lithium batteries demonstrated user the real looks of VoltX LiFePO4 batteries' internal structure and shows the detailing of the cabling works, cells and BMS.

APPLICATION

RV, Off-Grid Cabin , Floor scrubber, Low-speed vehicle, Golf cart ,Sightseeing cart , Forklift, Electric bicycle, AGV, Marine.

MAIN ADVANTAGE

- High acquisition of voltage data collection (5mv).
- Customized BMS function and parameter.
- Intelligent equalization management.
- Premium Prismatic Cells
- Over Charging, Over Discharging, Over Temperature, Short Circuit Protection.
- This BMS supports A matrix of 6 battery in parallel.
- Built-In LCD Indicator
