

Digital Rim Lock RL320

The RL 320 is a surface mounted intelligent auxiliary electronic lock that provides a convenient and secure locking solution for various projects.

- Durable metal body
- High resolution, backlit digital keypad
- Surface mounted electronic lock
- Encryption system for anti-hacking security
- Virtual number function for higher security
- High voltage prevention system
- Auto and manual lock functions
- High temperature alarm
- Volume control and mute function
- Emergency power via 9V battery
- Up to 4 sets of passwords and 100 RFID cards can be registered

Install condition: Door thickness 40mm-50mm
 Password registration: 4-12 digits, and up to 4 sets of passwords and 100 RFID cards can be registered
 Voltage: DC 6V, 4 LR6 1.5V AA Alkaline Batteries
 Emergency Power: DC 9V (Not included)
 Detection of High Temperature: Temperature Sensor, 72±5°C (Laboratory Environment), 62±5°C (General Environment)
 Material: Outer: Al, Zn, ABS Inner: Zn, ABS

- Surface mounting, easier to install
- Auto or Manual lock functions
- Support up to 100 RFID cards
- Support up to 4 sets of passwords
- Support one-time password
- Support to delete single RFID card
- High temperature alarm
- Alarm for multiple-entry failure
- Mute function
- Volume control
- Double authentication (Card plus password)

One-time password

You can set an one-time password for visitors

The password will become invalid once it has been used for opening the door
