**Disclaimer**

The company does not compensate for any damages and expenses caused by the following problems, please read this clause carefully before purchase.

- 1: Misunderstanding caused by unclear marking. Please mark on our drawing(s) with the accurate size and location(s) of tapholes on the requested stone top and sign on the edited drawing, which cannot be changed.)
- 2: Once the drawing is signed, it defaults that the size and location have been confirmed and cannot be changed. If you need to change it, please call our company to ask if it can be changed (if the cutting has already started, it cannot be changed)
- 3: The cutting error of each side is approximately 5-10mm (Due to manual cutting, the internal surface of the taphole cannot be guaranteed to be straight).
- 4: The company does not accept returns or exchanges due to changes in mind or failure of reaching the expected cutting effect as the stone top is cut based on the measurement on requested drawing.
- 5: During picking up or collection, customer MUST confirm whether the product is acceptable. Once the item has been collected, the company does not accept returns and exchanges caused by scratches and other defects after picking up.
- 6: The final interpretation right above belongs to the company.

**\*To ensure approximate space for drainage installation, basin holes are highly recommended to locate above vanity drawers/doors.**
