Deca-Durabolin is an intramuscular injection and the most common sites for injecting at the large muscles in the buttock, upper thigh or upper arm. The good news for those of us who are not enthusiastic about regular injections is that you can get away with a once weekly injection of Deca, although if you're taking a higher dosage some people. Deca-Durabolin is a clear yellow oily solution for injection containing 50 mg/ml of the active ingredient nandrolone decanoate. It is used to treat: osteoporosis (loss of bone tissue) certain types of anaemia. breast cancer (in women) patients on long term corticosteroids.

DECA-DURABOLIN⁷ (nandrolone decanoate injection) is slowly released from the injection site into the blood with a half-life of 6 days. In the blood, the ester is rapidly hydrolysed to nandrolone with a half-life of one hour or less. The half-life for the combined process nandrolone decanoate and

Due to the nature of Deca-Durabolin, side effects cannot be quickly reversed by discontinuing medication. Injectables in general, may cause local reaction at the injection site. Deca-Durabolin at the recommended dosages is unlikely to produce virilising effects. High dosages, prolonged treatment and/or too frequent administration may cause: [browse around this web-site](#)

Nandrolone Decanoate - Deca Durabolin. Updated on 09/29/2021. Nandrolone Decanoate, also called "Deca" is an anabolic steroid that many athletes and bodybuilders incorporate into their bulking cycles for phenomenal growth. It has been available since the 1960s, and it was first used for symptomatic treatment of disorders such as HIV/AIDS.

Deca-Durabolin is a clear yellow oily

solution for injection containing 50 mg/ml of the active ingredient nandrolone decanoate. It is used to treat: osteoporosis (loss of bone tissue) certain types of anaemia. breast cancer (in women) patients on long term corticosteroids. It belongs to a group of medicines known as anabolic steroids. Deca-Durabolin may affect some liver tests or may cause liver tumours, although very rarely. Due to the nature of Deca-Durabolin, side effects cannot be quickly reversed by discontinuing medication. Injectables, in general, may cause local reaction at the injection site. Reporting of side effects

Deca-Durabolin 50mg

injection is composed of Nandrolone and used to control anemia which occurs due to kidney diseases. It belongs to a class of anabolic steroids and enhances the carrying capacity of the blood. The medicine is not recommended for patients who are prone to an allergy to the active ingredients present in the drug.
