week1-10 test 250mg wk week1-10 Deca-Durabolin - nandrolone decanoate - 400mg wk week1-4 Dianabol - methandrostenolone - 25-30mg ED week8-14 Winstrol - stanozolol 50mg EOD i'm interested in starting a cycle similar to this and i've done quite a bit or research but i can't seem to run across any prices for a cycle similar to this. does anybody have a guess for about how much the street price. If you use Dbol with Winny, you are not going to get any cutting results. Dianabol can be stacked with other bulking steroids like Deca Durabolin, Sustanon (testosterone), Trenbolone etc. Winstrol, on the other hand, can be used with Anavar etc. for faster cutting results. Winstrol Cycle. Winstrol or Stanozolol is

essentially a cutting steroid.

As you may already know, there are several versions of testosterone with different esters attached to them. In this particular cycle (test/deca/dbol), it is most logical to use a long esterated testosterone such as cypionate, enanthate, or the sustanon 250 blend (which is mostly made up of long esters). The reason for this is that we already have a kick-starting oral compound (dbol), and deca.

8 or 9 weeks is way to short for test e and deca .. Those esters are long and 8 or 9 weeks won't do them justice.. Should be 12 weeks .. If you want to run a 8 week cycle of test and deca then use short esters , test prop,NPP. 10-11-2013, 02:33 AM #3. [sources tell me](#)

Week 1-12: test e 500mg/wk Week 2-5: dbol oral 50mg/day Week 9-12: winstrol oral 50mg/day I've got a trip to Cabo in 13 weeks, so I want to have finished my cycle by then. I've seen some threads saying do winstrol weeks 11-14, but I don't have time for that, so will I be okay doing it on weeks 9-12? It went as follows: wk 1-12 test-e 500mg. wk 1-5 dbol 30mg ed. wk 10-14 Winstrol (winny) 50mg. wk 3-12 hcg 500iu ew. nolva pct. so yea extend Winstrol (winny) to 5 weeks, right up until pct. i like this cycle better because u stopped test at week 12 and continued with the Winstrol (winny) Spyder run it the way he has it and the hcg too.

Test Deca Dbol Cycle -

Dosage, Benefits, and Side Effects. Since it is all about Test, Deca, Dbol Cycle, three of the best bulking steroids, let me begin by suggesting and even recommending a stack that has taken the market by storm

in 2021.. The brand that I am talking about is Crazy Bulk and is doing exceptionally well with its stack that consists of these steroids in combination with. I have never tried a NO TEST cycle before but i am intrigued on results on a classical cycle: Deca+Dbol Atm at home have some vials of DecaMix (100NPP+200Deca), i weight 103kg at 8% bf, therapeutic dose of Deca should be 300mg ew. I would start at 600mg Deca stacked with 50 D bol and 50 Winstrol, that way will be a complete therapy (test + 19nor+ dht).

Week 1 - 5 - Dbol 30mg/day -  
Test E 300mg/twice a week. week 6 - 8 - Test E 300mg/twice a week. Week 9 - 14 - Test E 300mg/twice a week - Winstrol 50mg/day. Adex - 1mg EOD. PCT: Clomid - 150/100/100/50 (worked exceptionally well on my first cycle) -----. I dont have any access to hcg at the moment. does my cycle look good or should i make some. [click here](#)
