

MGP 26

Wax stripper

Universal dewaxer for removing polishing wax. It removes water-based wax of metal, synthetic and natural type. Ideal for removing old wax from marble, granite, stone, terracotta, floors, etc. Easy-to-use.

Coverage: 1 liter for approx. 10-50 m² depending on the finish of the surface and on the dirt.

Strong Points

- Concentrated
- High dilution ratio
- Universal, suitable for any kind of surface
- Easy-to-use

 Solvent Free

Application

SHAKE BEFORE USING.

CONCENTRATED PRODUCT.

Dilutions: - light: 1 litre MGP 26 in 5-6 litres of water
- strong: 1 litre MGP 26 in 2 litres of water

Pour the suitably diluted product onto the surface, on small areas at one time. Allow to act about 10 minutes, rub using a cleaning machine, suck up the dirt with a wet vacuum cleaner, rinse out with water. On very rough surfaces like bushhammered, flamed etc. it is recommended to use a brush.

Warnings

Before using the product, read the toxicological data sheet (MSDS) and the label detailing all risks and the personal protective equipment to be used for a correct use. The data of this technical data sheet is based on reliable information. Despite of this, the manufacturer can't know in advance the condition of the materials to be processed and the way of use of the product. Therefore, he disclaims any and all responsibility for damage arising from inadequacy of the product for special applications.

Before treating or cleaning surfaces, carry out a test on an invisible point to prevent possible damages, since our responsibility is limited to the warranty of the purchased product and therefore we disclaim any responsibility for damages resulting from negligence or wrong use.

Packaging and Storage

Keep the original, sealed container in covered, ventilated, dry environment and keep away from heat or low temperatures. After the use keep the package well closed, so the product has a shelf life of approx. 36 months. Box of 24 0.500 L bottles - Box of 15 x 1 litre bottle – Box of 4 x 5 liter cans
