

MG SOLVENT

Solvent wax stripper

Solvent wax stripper for any kind of wax, glue, silicon, previous treatment.

Coverage: 1 litre for approx. 4-5 m²

Strong Points

- Concentrated
- Universal, can be used on any kind of surface
- Easy to use
- No problems to the surfaces
- For small surfaces and manual applications

Application

SHAKE BEFORE USING

Apply the product directly onto the surface to be cleaned, spreading it out evenly on small areas at a time. Leave for a few minutes and then rub. Remove the melted wax and the dirt with sawdust or absorbing paper.

Warnings

Before using the product, read the toxicological data sheet (MSDS) and the label detailing all risks and the personal protective equipment to be used for a correct use. The data of this technical data sheet is based on reliable information. Despite of this, the manufacturer can't know in advance the condition of the materials to be processed and the way of use of the product. Therefore, he disclaims any and all responsibility for damage arising from inadequacy of the product for special applications.

Before treating or cleaning surfaces, carry out a test on an invisible point to prevent possible damages, since our responsibility is limited to the warranty of the purchased product and therefore we disclaim any responsibility for damages resulting from negligence or wrong use.

Packaging and Storage

Keep the original, sealed container in covered, ventilated, dry environment and keep away from heat or low temperatures. After the use keep the package well closed, so the product has a shelf life of approx. 36 months.

Box of 15 x 1 litre bottle – Box of 4 x 5 liter cans
