

OLD STONE

Chemical sandblaster

OLD STONE is an acid-based composition for the chemical sandblasting of marble. It is especially recommended for small productions. Not suitable for stone, granite, sandstone.

Coverage: 1 litre for approx. 2-3 m2 depending on the finish of the surface and on the desired effect

Strong Points

- Quick application
- Unlike common acids which finish acting in a few minutes OLD STONE reacts until rinsing out
- Neutralised and residueless after simple rinsing
- Especially indicated for honed surfaces

Application

SHAKE BEFORE USING

READY TO USE PRODUCT, DO NOT DILUTE.

ONLY USE WEARING PROTECTIVE GLASSES AND GLOVES.

Evenly apply onto the surface. To carry out the treatment more easily use a plastic watering can. Remember to damp the surface evenly with the product. DO NOT attempt to pour the product in a single point and to spread it out with a brush.

Allow the product to act for 10/15 minutes according to the desired effect, then rinse out with plenty of water. For a more evident effect, repeat the treatment. Always work in the open air or turn on the suction system.

To increase the effect of OLD STONE, spray water on the surface after the application, so to reactivate OLD STONE and to obtain a stronger effect. Suck up the surface with a water vacuum, rinse out with water and MGP 24 detergent.

For the ordinary maintenance of the treated surface we recommend the regular use of MGP 25 detergent.

Warnings

Before using the product, read the toxicological data sheet (MSDS) and the label detailing all risks and the personal protective equipment to be used for a correct use. The data of this technical data sheet is based on reliable information. Despite of this, the manufacturer can't know in advance the condition of the materials to be processed and the way of use of the product. Therefore, he disclaims any and all responsibility for damage arising from inadequacy of the product for special applications.

Before treating or cleaning surfaces, carry out a test on an invisible point to prevent possible damages, since our responsibility is limited to the warranty of the purchased product and therefore we disclaim any responsibility for damages resulting from negligence or wrong use.

Packaging and Storage

Keep the original, sealed container in covered, ventilated, dry environment and keep away from heat or low temperatures. After the use keep the package well closed, so the product has a shelf life of approx. 36 months.

Box of 2 x 12.5 kg cans
