## Application Guide

### Minimum adult amounts required

|                        |                        |
|------------------------|------------------------|
| Face, Ears, Neck ..... | 1 measure twice a day  |
| Arms, Back .....       | 2 measures twice a day |
| Legs .....             | 4 measures twice a day |
| Hands .....            | ½ measure twice a day  |
| Genitals .....         | ½ measure twice a day  |

Children under ten years of age require half the above amounts.

1 measure (4g of Epaderm Cream)

## How Epaderm® works

Epaderm® Cream is an emollient formulated with clinically-proven ingredients that can be used on the skin or as a skin cleanser.

In a recent study, over 85% of healthcare professionals noticed an improvement of the dry skin and nearly 85% of patients had an improvement in the skin softness after four weeks of Epaderm Cream use<sup>1</sup>.

By providing a film barrier, Epaderm Cream aids moisture retention within the skin. This product relieves dry skin symptoms by improving rough and scaly, dry skin<sup>1</sup>.

Emollients are particularly helpful for people with dry skin, which is often the cause of widespread itch; they are especially effective if applied immediately after washing or swimming<sup>2</sup>. Emollients can help to reduce the risk of skin tears<sup>3</sup>.

## Benefits of Epaderm Cream

- 97% of people who tried Epaderm Cream in a survey recommended it<sup>1</sup>
- Moisturises and softens the skin
- Improves skin hydration in as early as two weeks
- Suitable for all ages including babies
- Epaderm Cream can be used on the skin or as a skin cleanser
- Free from fragrances, steroids and sodium lauryl sulphate (SLS)

## Material Properties

- Yellow Soft Paraffin
- Liquid Paraffin
- Cetomacrogol Emulsifying Wax
- Chlorocresol
- Glycerine
- Purified Water

## Areas of use

Epaderm Cream is used for the management of dry skin conditions, eczema and psoriasis. It is suitable for all ages, including babies.
