

# CLIP RODDER

The Adept Beef Rodder is used to separate the weasand (esophagus) away from the trachea and from other connecting tissue. The Adept Beef Weasand Clip is then applied and pushed up into position using the Adept Beef Rodder.

- > Designed for optimum separation of connecting tissue without cutting
- > Fast and easy to use
- > Lightweight and ergonomic
- > Polished finish for ease of cleaning and sterilization
- > Available in two sizes
