

ORANGE
PET NUTRITION
the Pet Food People..

2023

Orange Pet Nutrition was founded by two Pune-based animal lovers, Bharat Pittie and Aiyaz Hamirani, who wanted to improve the lives of pets beyond their own.

We are a platform sourcing top brands from around the world for pets, small and big, four-legged and feathery. With the goal of enriching the quality of life of not just pets but also their doting pet parents, we are India's leading distributors determined to make the pet food and supplies space a safe, resourceful and above all, a progressive one.

We understand pets here at Orange Pet Nutrition Pvt Ltd. We strive to meet their dietary requirements. Perhaps it's because we ourselves are pet parents, or perhaps it's because of the depth of our experience in the pet food industry. The truth is that we are fully cognizant of the ideal diet for pets. And perhaps that's what makes us a trusted pet food and supplies distributor in India.

fidèle⁺

...happiness in every bow

We understand it is hard to prepare home-cooked meals or Ghar Ka Khaana for your dog every day, and even harder to ensure proper balanced nutrition for your four-pawed bundle of joy when of wholesome pet food brands with quality ingredients that fit the pocket of the Indian pet owner and formulated Fidele with the expertise of international Veterinary & Canine Nutrition Experts.

In 2021, we decided to retain our Indian roots and add a herb mix that resonates with well-being. Fidele+ though produced in Belgium to match the highest international standards, our recipes are inspired by the simple, wholesome nutrition of Ghar Ka Khaana. Unlike other brands, we choose to stand by the goodness of age-old familiar ingredients like chicken, rice, turmeric, basil, coconut oil, ginger, flaxseed, etc. We believe in honest ingredients—no jumbled mess of misrepresented protein parts, chemicals here... just wholesome, handpicked, protein-rich ingredients that promote health and long life!

MERA®

The Petfood Family

We are passionate about the well-being of cats and dogs

That's why, as a family-owned company in its third generation, we put our heart and soul into creating high-quality nutritional concepts that are completely tailored to your pet's needs. The variety of valuable ingredients, the highest quality controls as well as the careful production of our products in Germany are deeply rooted in our culture. We place responsibility, honesty and reliability at the centre of what we do. Mindfulness when dealing with each other is the secret behind any long-standing friendship.

MERA is an independent family-owned company from the Lower Rhine. All of our activities are designed to secure and further strengthen the continued existence of our company. For today and the generations to come.

ESSENTIAL

Our dogs are unique and the same goes for their nutritional needs. With MERA essential we provide the right feed for every dog, at any age and no matter how active it is - from puppies to seniors and from the classic family dog to the high-performing athlete.

PURE SENSITIVE

The species-appropriate and holistic nutritional concept Pure like nature and focused on the essentials.

Your sensitive friend will of course find it easy to digest: With MERA pure sensitive provides your dog with an all-round nutritional concept that focuses on the essentials. Instead of exotic ingredients, pure sensitive with potato mainly contains regional ingredients.

On the basis of Limited Ingredient Diet (LID) we abstain from everything that is unnecessary and therefore create the conditions for optimum compatibility. According to a proven recipe, only one source of animal protein is combined with one source of carbohydrate. With MERA pure sensitive we meet the needs of fresh meat and high protein products. Holistically developed, the products are available as complete dry food, wet food and as snacks.

EXCLUSIVE

Large and giant breeds with a final weight of over 40 kg should switch to MERA Exklusiv sensitive Junior from 6 months to avoid growth defects, which can occur due to an oversupply of energy. MERA Exklusiv sensitive Junior should always be fed until they have grown to full height - up to between 18 and 20 months for giant breeds (Great Dane).

Taste of the Wild

The balanced diet that nature intended®

Your pets crave the same flavors their ancestors once did. Go ahead and indulge them.

Modern science proves that your dog or cat still shares the DNA of the ancient canine or feline. Taste of the Wild dog and cat foods were created to give pets and discerning pet parents a pet food option inspired by the protein sources your dog or cat was meant to eat. To give domestic dogs and cats the vitality nature intended, their pet food must contain all the ingredients and nutrition they need to thrive. And that is precisely what they get with all Taste of the Wild recipes: complete pet foods based on the protein sources from your pet's ancestral diet.

The roasted and smoke-flavored proteins your dog or cat craves, in a variety of grain-free recipes* to suit every taste.

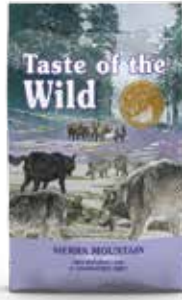

PACIFIC STREAM PUPPY

Product Code	Wt	MRP
2582HT18	2 kg	₹ 1900
9756HT77	5.6 kg	₹ 4990

ZuPreem®

THE POWER OF PELLETS

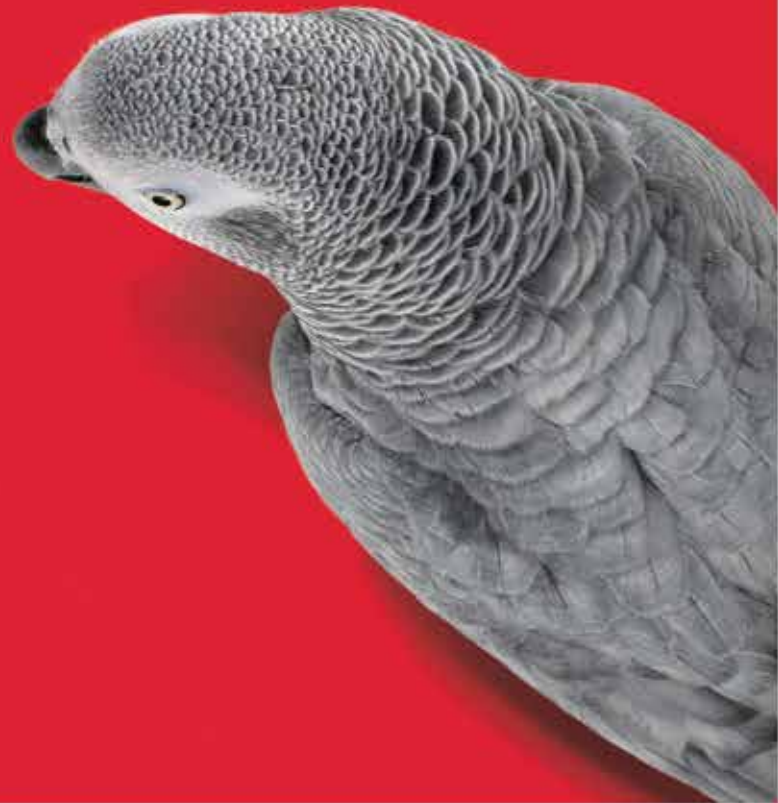

An Extraordinary Idea Is Born

The history of ZuPreem® started with an idea – an idea that changed the way we look at the role of nutrition in the lives of all animals. The idea was revolutionary and at the same time very simple. Provide Exceptional Diets for Extraordinary Animals®. This is the mission of the ZuPreem brand today and its guiding force for years to come. Developing Better Diets For The Pets We Love

The idea for better pet nutrition started almost 100 years ago when it was discovered that sick pets could be treated by changing their diets. As science and improvements in animal health advanced, we're glad we picked up the phone in the early 1960's and talked to a zoo director who wanted to explore a different way to feed the animals in his zoo's collection. Our response launched the ZuPreem brand and forever changed how and what we feed these extraordinary animals. Building on this heritage, ZuPreem expanded the brand to include nutrition for non-traditional pets, with a focus on caring for each animal and each caregiver with the highest quality, most perfectly formulated nutrition possible.

Leading With Expertise

At ZuPreem, providing our pet owners and caregivers the best possible information on nutrition and health is always at the top of our mind. That's why we partner with experts in the field of veterinary health to bring us the latest on nutrition and feeding practices. Our veterinary partners help us create healthy nutrition programs, develop new product offerings and keep our pet owners informed on overall animal wellness.

THE BEST FOR YOUR PETS

The healthy lifestyle of your little pupili is an asump for us for continuous development. This is why we attach so much to the quality of the ingredients. We offer only the best foods and smakers, which will provide animals with necessary vitamins and necessary ingredients for proper development.

Our feeds are based on ingredients that are the natural food of animals in their living environment. All feeds are based on high-quality ingredients with a lot of variety. Some of them even have 45 different ingredients in the blend! All this to provide animals with a source of essential nutrients for proper growth, development and reproduction thanks to the diversity of ingredients.

Quality is of great importance to us, which is why the production process of our pet food is controlled at every stage by the employees of the quality control department – from the receipt of raw materials, preparation of mixtures according to strictly defined recipes, through the packaging process, to their proper storage. We attach great importance to uniqueness, which is why over 80% of our smakers' production is hand-made.

The variety of feeds is based on multi-component compositions for traditional nutrition (fruit, vegetables, cereals, seeds, granules, extrudates). The form of granules allows you to avoid selective selection of ingredients from the mixture, thanks to which we can be sure that we provide your pets with everything they need.

The uniqueness of our products is also based on the technologies used in the production of packaging: protective atmosphere – method of packaging food that ensures our products an extended shelf life, a window in the packaging – allows the customer to familiarize themselves with the product without having to open the packaging or a system that allows the re-closing of the packaging. We are constantly changing for you, so we make sure that the packaging of our products has attractive, modern graphics and is made of the best materials.

Helps to prevent fright moulting

OROPHARMA CALCI-LUX

Product Code	Wt	MRP
460214	150 g	₹ 1650
460215	500 g	₹ 2825

It is a high-quality, water-soluble source of calcium. This dietary supplement is administered for good egg shell formation, for good skeletal development in young birds, during the breeding season to prevent egg-binding and in cases of calcium deficiency or calcium tetany.

A calcium supplement for a good egg shell formation

Promotes a healthy skeletal development in young birds

To be administered as a supplement also in cases of calcium deficiency or calcium tetany

OROPHARMA OPTI-BREED

Product Code	Wt	MRP
460221	500 g	₹ 2175

Is a well-balanced blend of amino acids, vitamins, minerals, trace elements, Florastimul® and L-carnitine. Supports general health and productivity and contains all the components your birds need for a good development. Adding Opti-Breed to your own eggfood blends ensures optimal breeding and growth. Florastimul® is a prebiotic, feed for good bacteria in the intestines. It supports the quality of the intestinal flora and ensures a good digestion. L-carnitine supports the growth of the chicks. L-carnitine also supports fat combustion, which results in greater availability of energy for physical exertion.

OROPHARMA PROBI-ZYME

Product Code	Wt	MRP
460211	200 g	₹ 3300

It is a combination of probiotics and digestive enzymes. This dietary supplement promotes the crop and intestinal flora, increases good intestinal flora, ensures a better digestion of the food and gets the intestinal and crop flora of one day old chicks started. It contains probiotics. These are good bacteria present in the bird's intestines (and crop). In addition to the good bacteria, Probi-Zyme contains special enzymes that promote the digestion of the food eaten.

OROPHARMA ORO-DIGEST

Product Code	Wt	MRP
460244	150 g	₹ 2150
460210	500 g	₹ 4650

It is an intestinal conditioner. This product prevents the adhesion of pathogenic bacteria in the intestines, ensures a better consistency of the droppings, promotes hygienic nests and prevents the cloaca feathers from sticking together. It serves as a prebiotic or food for the good intestinal flora. The added probiotics help to inhibit pathogens thus stimulating the growth of positive bacteria.

OROPHARMA CAN-TAX

Product Code	Wt	MRP
460217	150 g	₹ 3000
460218	500 g	₹ 5600

Product Code	Wt	MRP
412418	2.5 kg	₹ 1040

Colombine Sneaky Mixture is a titbit mix with sesame seed and conditioning seeds. Sesame seed is rich in essential fatty acids that promote the pigeons' immunity and feather quality. Health seeds are wild seeds that pigeons find in the wild.

With small oily and fatty seeds, readily accepted and very well ingested

With hemp seed that can help to excite widowers
Very popular product as a trapping mixture.

ALL-IN-ONE MIX EXPERT

Product Code	Wt	MRP
413314	10 kg	₹ 5400

Complete low-protein feed for pigeons enriched with the Immunity Concept+ pellet. Because of the low protein content, the pigeons maintain a good condition during the week.

Enriched with black maize, a very rich source of antioxidants responsible for muscle protection, less muscle cell damage and more endurance.

Mixture is easily digestible and provides the pigeon with all the necessary vitamins, amino acids and minerals. It also guarantees an optimal protection against gastrointestinal problems.

COLOMBINE RED STONE

Product Code	Wt	MRP
412300	2.5 kg	₹ 600

Promotes digestion and absorbs harmful substances during digestion.

Source of trace elements and minerals
