Oropharma Probi-zyme 200gms

- Oropharma Probi-Zyme is a combination of probiotics and digestive enzymes. This dietary supplement promotes the crop and intestinal flora, increases good intestinal flora, ensures a better digestion of the food and gets the intestinal and crop flora of one day old chicks started.
- Special enzymes that promote the digestion of the food eaten.
- Probi-Zyme is one of the few products in which the concentration of good bacteria is guaranteed.
- Very important after an antibiotics treatment
- In case of intestinal problems it should be combined with Oropharma Oro-Digest

DIRECTIONS FOR USE

1 even measuring spoon (= 1 g) Probi-Zyme per 100 g of Soft food for at least 5 consecutive days. Probi-Zyme must be mixed in the food and never in the water. Store in a cool and dry place.

Oropharma Can-tax 150gms

- Oropharma Can-Tax is a red colourant based on canthaxantin.
- When adding Can-Tax to the food canthaxantin is transported to the place where the feather is growing and it is given the more intense red colour.
- The feather formed retains its colour until the formation of a new feather.
- Ensures a beautiful even red colour in red canaries
- Can intensify the red colour in other birds

DIRECTIONS FOR USE

1.5 to 3 g CAN-TAX per 100 g soft food or per 200 ml drinking water.
A maximum of 1% of the daily ration may consist of this complementary feed.

Store in a cool (5-20°C), dark place and in the original, well-sealed packaging

Oropharma Oro-Bath 300gms/ 50gms

- Oropharma Oro-Bath is a special bath salts care product for glossy plumage.
- It makes feathers more supple, keeps the feet and skin free from scaling and ensures glossy feathers.
- Everyone knows that birds like to bathe and need it. Regular bathing is essential for maintaining the feathers.
- To maintain the strength and water-resistant function of the plumage.
- A beneficent treatment for the bird's skin and plumage
- Relaxes the muscles and cleans the skin and feathers softly
- Preventive care against feather mites

DIRECTIONS FOR USE

1 even measuring spoon (= 1 g) per 250 ml lukewarm bath or sprinkling water.

The solution may be put in the bathing tray or with the help of a plant spray be sprinkled over the birds.

In the remaining periods: 2 x a week.

During the winter: 1 x a week

During the exhibition season: 1x before caging, 1x when returning from an exhibition and in between exhibition every 2 or 3 days.

If Oro-Bath is added to the bathing water, it should be removed after a couple of hours.

Oropharma Jungle Shower 500ml

Feather conditioner

- Oropharma Jungle Shower is a spray with aloe vera for glossy plumage and a healthy skin.
- This care product cleans the feathers, restores the balance of moisture of the skin and feathers, limits the loss of feather dust and helps to keep the skin healthy.
- Ideal as a shower for pet birds
- A beneficent treatment for the bird's skin and plumage
