Exceptional diets for
extraordinary pets

A COMMITMENT TO IMPROVING THE LIVES OF ANIMALS THROUGH PROPER NUTRITION.

The Morris family, pioneers in life-stage diets for companion animals founded ZuPreem® in 1968. Their commitment to an innovative, science-based approach to proper nutrition became widely recognized within the pet care and animal health industries. After more than 50 years, the same dedication to high-quality pet nutrition is as strong as ever and the legacy continues with the third generation of the Morris family.

Today, ZuPreem manufactures carefully balanced food for birds, rabbits, guinea pigs, ferrets, exotic felines and primates. ZuPreem pet products are found at most pet specialty retail locations worldwide.

Raritan Animal Hospital in 1928 where the original Hill's® Prescription Diets were formulated. This contribution to animal nutrition eventually led to the development of the ZuPreem® line of diets.

NUTRITION MATTERS

Just like people, pets need proper nutrition for good health and longevity. This means feeding and recommending specifically formulated diets that include the proper balance of carbohydrate, fat, and protein, along with essential vitamins and minerals. This intricate balance keeps their digestion running smoothly, their metabolism working properly, and their immune system functioning effectively.

Poor nutrition can lead to nutrient deficiencies, disease, and an overall feeling of ill health for any pet. Improper nutrition can also lead to a shorter life span, expensive medical treatments and ill-temperateness as pets spend more time fighting illness and less time happily interacting with caregivers.

Be part of the solution. Help prevent health problems and promote a pet's long, happy and healthy life. Select premium food and choose diets that are nutritionally balanced and complete.

Nutrition really does matter. With your help together we can foster healthy, happy pets and improve the lives of those who care for them.
