

Hydro-Sorb II

Fuel Tank Water Remover

Stop Water in Its Tracks

You know fuel and water don't mix, but how do you keep your fuel tanks dry? Condensation and the occasional bad fuel load spoil fuel quality in your tanks over time leading to bacteria and fungal growth, corrosion of your fuel system, fuel filter clogging and component failure. Keep your fuel tanks and fuel systems dry with Hydro-Sorb II, a powerful co-solvent that disperses moisture on the molecular level, keeping it safely held in solution with the fuel until it can be sent out the exhaust pipe. Hydro-Sorb II protects your fuel tanks, pumps and injectors from corrosion, and prevents fuel line freezing and filter icing. Unlike traditional methanol and ethanol co-solvents, Hydro-Sorb II will not cause advanced rust and corrosion, and it eliminates the water layer habitat that allows fuel-degrading bacteria and fungus to grow in tanks.

BENEFITS

- **Removes moisture and free standing water from fuel storage tanks**
- **Treats diesel, kerosene and gasoline fuels**
- **Reduces rust and corrosion in fuel tanks**
- **Prevents water related fuel system corrosion, wear and damage**
- **Prevents fuel line freeze-up and filter icing**

Keeping Your Fuel Tanks Dry:

Bulk Tanks

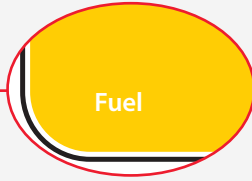

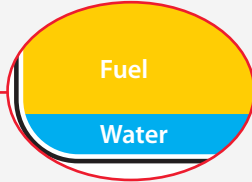

Water Removal

Free standing water in your bulk tanks leads to shortened filter life, tank corrosion and fuel degradation. Large amounts of water should be drained or pumped out, then treat with 1:1000 Hydro-Sorb II to remove residual moisture.

Keep Dry

Keep bulk tanks dry by treating with 1:1000 Hydro-Sorb II as needed.

Vehicle Tanks

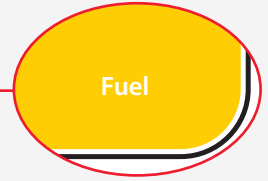

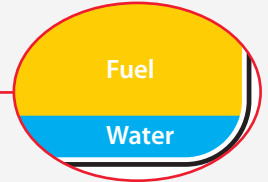

Water Removal

Water in vehicle tanks is a serious issue that can quickly shut down your vehicle. Free standing water should be drained or pumped out, then use Hydro-Sorb II at a 1:500 treat ratio to remove residual moisture from vehicle tanks.

Keep Dry

Keep vehicle tanks dry by treating with 1:500 Hydro-Sorb II (one quart treats up to 125 gallons) as needed.

For optimal results use with:

INJECTOR-KLEEN™

Keep your gasoline fleet running at peak performance with Injector-Kleen, a powerful gasoline fuel improver and fuel system cleaner that removes combustion deposits, gums and varnishes to maintain optimum horsepower, emissions and fuel economy.

POWER KLEEN™

Give new life to your diesel fuel system! Power Kleen keeps the entire fuel system clean: powerful nitrogen cleaning molecules dissolve deposits of carbon, gum and varnish in fuel injectors, lines and tanks, and prevents their reformation.

About Hydrotex®

Hydrotex® is a manufacturer and distributor of high performance lubricant and fuel improver solutions. As an employee owned company, we help our customers develop sustainable solutions designed to help improve system reliability, save energy, limit pollution, extend fixed asset life, reduce maintenance costs and improve fuel efficiency. Our products and services leverage over 80 years of innovation resulting in superior lubrication solutions.

The Hydrotex Warranty

When properly stored and used in accordance with instructions, any material not satisfactory will be replaced with any product in our line on a dollar for dollar basis provided the account is paid in full when due, and Hydrotex is notified, in writing, within 12 months of the date of the order by the customer.
