

# MTP Ultra™

*Hydrosynthetic® Lubricating Grease*

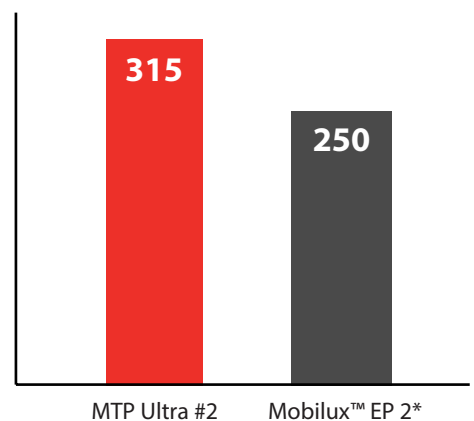

## Because the job won't wait on spare parts

Keeping machinery running reliably is critical to your construction operations. What can you do to better protect your equipment? MTP Ultra protects your operation's productivity by maintaining a protective lubricant coating on machine components and keeping dirt and moisture out of contact zones. Formulated with adhesive/cohesive Resilium® polymers, MTP Ultra stays in place, so parts stay protected and extended greasing intervals are maintained. Excellent for chassis points, fifth wheels and non-disk brake wheel bearings, as well as moderately loaded pins and bushings, MTP Ultra is designed specifically for your construction equipment requiring a tacky EP grease.

### BENEFITS

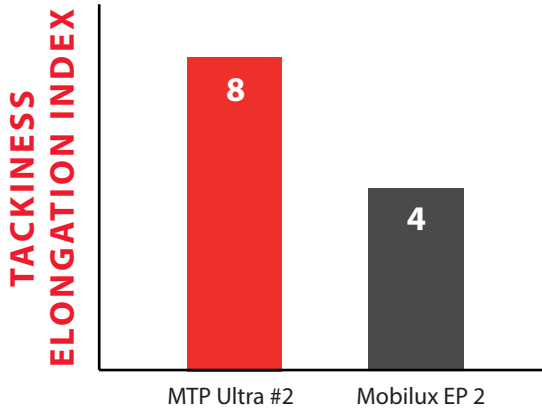

- **Outstanding anti-wear and extreme pressure protection to maximize equipment life**
- **Tacky formulation resists contamination, sling-off and pound out under heavy loads**
- **Protects against rust and corrosion**
- **Resists oxidation to ensure long grease life**
- **Exceptional water washout resistance**
- **Good fluidity and pumpability**

4-BALL WELD LOAD (KGF)

\*Hydrotex® lab test result 2016

*MTP Ultra exhibits exceptional tackiness and adhesion to keep water and contamination out of your bearings.*

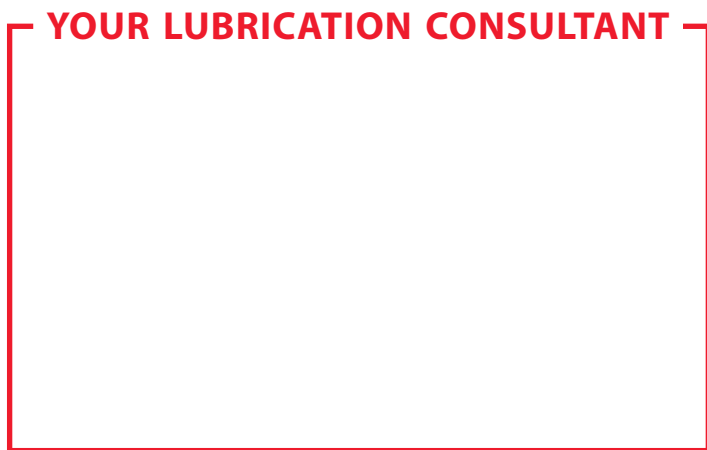

**Ask your Hydrotex representative about how Lubrication Management can add value to your business.**

- Improve Reliability
- Increase Uptime
- Optimize Efficiency

## The Hydrotex Warranty

When properly stored and used in accordance with instructions, any material not satisfactory will be replaced with any product in our line on a dollar for dollar basis provided the account is paid in full when due, and Hydrotex is notified, in writing, within 12 months of the date of the order by the customer.

## For optimal results, use with:

### POWER KLEEN™

Give new life to your diesel fuel system! Power Kleen keeps the entire fuel system clean: powerful nitrogen cleaning molecules dissolve deposits of carbon, gum and varnish in fuel injectors, lines and tanks, and prevents their reformation.

### PIN-TAC™

Protect your heavy duty construction and earth moving machinery with Pin-Tac high performance construction and mining grease. Formulated using robust adhesive/cohesive Resilium polymers and 3% technical-fine grade Molybdenum Disulfide, Pin-Tac is built to provide maximum, long lasting protection to highly loaded pins, bushings, bearings and chassis points against corrosion, water washout and pounding loads under the extreme pressures and temperatures experienced by heavy duty construction and mining equipment.

### ESSENTIALUBE®

Keep your engine in pristine condition by flushing with Essentialube, our powerful blending agent which reduces the harmful effects of engine acids and increases engine life. Contains ashless additives and pure hydrocarbon ingredients, contains no metallic additives and will not void warranties.
