About Code

Established in 2014, Code has been the answer to New Zealand's quest for superior bathroom and kitchen solutions, embodying a contemporary, minimalist design ethos. Originating in Auckland, our journey has seen us evolve into a nationwide front runner in the realm of bathroom and kitchenware.

Our core mission revolves around enriching everyday living spaces with a blend of elegance and opulence, achieved through the utilisation of premium materials and impeccable craftsmanship, all while prioritising functionality and innovation.

Nurtured within the vibrant design landscape of New Zealand in mind, we are committed to elevating your daily living experience with seamless sophistication and flair. Collaborating closely with interior designers and architects, our collections draw inspiration from nature, seamlessly marrying modern aesthetics with minimalistic sensibilities.

We trust that our products will bring you as much joy as they bring us!

Product Info

The level of durability, cleaning maintenance and product qualities vary between each material finish. Our product guide can be used to help decide which kitchen sink is the right finish for not only your space and style but your lifestyle and needs too.

The nano coating is made up of nano-sized ceramic compounds. These compounds form a thin transparent coating that is fused with the 304 Stainless steel surface.

Protection against permanent discoloration or marks due to spills, without lasting damage or discoloration

Though each of our sinks have been tested and developed for maximum durability, certain materials are especially resistant against scratches

Our sound insulated sinks muffle water flow noise and other echoes for a quieter peaceful environment.

Minimal up keep and cleaning maintenance required to keep your sink looking brand new.

Withstands high temperatures for enhanced functionality and longevity.

Please note all of our sinks have undertaken numerous tests to provide this information. Our sinks come with a ten year warranty should you be unsatisfied with the durability or quality of our product.

Colour and Material Finish

Each of our unique finishes come with a product code that can be found below the colour swatch. This code can be added onto any product code found through the booklet to specify exactly what colour and finish you would like for your order. For example; The complete product code for an Aspen 700 x 400 Sink (AS74) in Brushed Brass (BB) would be AS74BB

304 Stainless Steel with PVD Coating

This high-quality finish is highly durable and low maintenance with a striking look. Stainless steel compliments contemporary and industrial design styles whilst remaining practical and scratch resistant for high traffic spaces. Stainless steel is 100% recyclable with a long lifespan making it an ecofriendly choice with a modern appeal. All coloured Code aspen sinks come in a durable PVD finish. Physical Vapour Deposition coating, also know as thin film coating, is a process in which a solid material is vapourised in a vacuum and deposited onto the surface of the sink. Compound materials are deposited atom by atom, forming a thin, bonded, metal surface layer that greatly improves the appearance, durability and functionality of the aspen range of sinks.

Aura Granite Collection

For a contemporary look with a quality finish, our Aura range features durability which lasts against heat, scratches, stains, and impacts. If you want a sink for heavy use that keeps its beautiful looks over time, we highly recommend this one. Aura comes with a stainless steel waste for a seamless look and is compatible with insinkerators. Crafted from engineered stone quartz, its antibacterial qualities produce a sanitary surface that shields you from potential bacteria and germs whilst looking beautiful in your kitchen.

Sink Care Guide

In this guide, we will walk you through essential maintenance and cleaning procedures to keep your kitchen sink looking pristine and functioning at its best. By following our recommendations, you will prolong its lifespan, making it a worthwhile addition to your home.

Aura Granite

Daily Maintenance

To clean marks and everyday traces of use from your sink on a day-to-day basis, all you need is a sponge, mild detergent, and water. Slightly moisten the sponge under running water. Squeeze a small amount of mild detergent onto the soft side of the sponge. Clean your granite sink by rubbing it with the sponge in small, circular movements, using only the soft side of the sponge. Once you're finished, rinse your sink thoroughly with clean water. Finally, rub your sink dry with a microfibre cloth to prevent limescale deposits.

Deep Cleaning

If you have left your Aura granite sink unmaintained for an extended period, you may notice limescale deposits will gather on the surface. While the deposited limescale is easy to spot against dark sinks, it can easily go unnoticed at first on light-coloured sinks. To address this please use an acid-based cleaning agent, such as vinegar cleaner or citric acid. They will dissolve the lime and dirt layer and restore the sink to its original colour. Simply spray the sink with an acid-based cleaner and let it work for a short time. Then rinse the sink thoroughly with clean water, wipe down with a sponge and finally wipe dry with a microfibre cloth.

304 Stainless Steel

Daily Maintenance

Simply wipe down with a soft cloth and warm soapy water to remove any surface contaminants. To further reduce water spots, dry with a soft towel or a dry cloth. When the water evaporates, the minerals/salts are left behind, these can create water deposits (like on your car if you don't wipe it down with a dry cloth). For more stubborn marks, use a 50/50 mix of white vinegar and water or a non acidic spray and wipe. Apply with a soft clean cloth then rinse and dry immediately.

Deep Cleaning

For more stubborn marks, use a 50/50 mix of white vinegar and water or a non acidic spray and wipe. Apply with a soft clean cloth then rinse and dry immediately.
