
Age Verification

In most areas, the sale of tobacco and/or alcoholic beverages to minors is prohibited. Most ECR series offers an age verification feature that helps control the sale of restricted items by forcing the operator to enter a birth date before a controlled item can be registered. If the date entered shows that the customer has not yet reached the appropriate age, the item cannot be registered. This feature serves as a reminder to check the customer's identification.

Because different categories of items might require different ages (for example, alcohol might require age 21, while tobacco might require age 18) up to five different age categories can be defined.

This program allows you to set the required age for each of the five available age categories. See "Group Programming" in the "Program Mode Programming" chapter to link an age category to groups of PLU items.

Note: When age verification is implemented, an age entry is required only for the first controlled item from each age category.

Age Verification Programming in Z MODE

Z MODE > 5. AGE VERIFICATION

Enter the age required for the first group of age-restricted items, Press CASH. (For example, enter 21 if sale of liquor requires an age of 21. You must also program the age verification category of '1' for all groups of liquor items)

If other items are to be restricted by a different age, program additional age verification groups as necessary.

Press CASH to PROGRAM next Ages

If not required to program Age, press CASH and continue

Press CLEAR , to exit without saving

Age Verification Programming in GROUP

PROGRAM MODE > 2. GROUP > ENTER GROUP (1 - 20) + CASH

GROUP Menu displayed

Go to Menu 9. AGE VERIFICATION

Option	Entry	Description
GIFT CARD	0, 1 or 2	If a PLU in this group is used to register a new gift card, select 1 for "activate". If a PLU in this group is used to add a value to an existing gift card, select 2 for "add". For normal PLU registrations use the default value of "0".
AGE VERIF.	0-5	When an item in this group is registered (first time in a transaction only), the register will prompt the operator to enter the customer's date of birth. The sale of the item will be registered only if the customer has reached the appropriate age. Set "0" for no age requirement. Set "1" to "5" to check the date of birth against the age requirement group set in Z Mode.
