

# DB USA HAND WRAPPER OPERATION MANUAL

## OPERATION MANUAL

### Machine Placement

1. Place machine slightly separated from a wall so there is no contact.
2. Since this product is an electric product, install it in a room with minimal moisture and grease.

### Roller Installation

1. Open the right side plate and insert the small roller.
2. Place and secure the foot panel to the grooves in the side panels with the black bolts.

### Wrapping Film Installation

1. Loosen the left and right black bolts on the workbench and pull the bench forward to remove.
2. Slide the film onto the roller and pull in the direction of the arrows shown above. (Pull the film under the platform below the workbench.)
3. Reposition the bench and use the black bolts to tightly secure it in place.

### Film Elasticity Adjustment

1. The elasticity can be adjusted using the tension bolts in the rear right to tighten loosened wraps.

### Power Supply

1. Check the input voltage and connect to power

### Front Panel Switch

1. When using the hot plate and hot knife, turn on the "HEAT CUTTING & HEAT BOARD" switch.
2. When the power is on, a yellow light turns on to indicate that the knife and plate are being heated.
3. The temperature of the heat plate can be adjusted from 50-140 Celsius to optimize bonding based on volume of object.

4. Store the heat plate by turning it off and pushing it inwards.

### Wrapping Methods

1. Place the object on the workbench and cover with the wrap.
2. Pull the object to give the object a better wrap.
3. Place the object on the heated hot plate.

### Caution

1. Do not touch the heated plate or knife with bare hands (The knife is made with stainless steel and keeps its high temperature for longer periods of time.)
2. The machine may maintain a high temperature even when turned off for a while, be careful to ensure it is cooled before storing.
3. The hot plate has a special Teflon coating. To properly clean it, use cloth or a towel and never metal. Regular cleaning will ensure that the hot plate can be used for a long time.

Made in Korea
