Sensor Troubleshooter

1. Press `SET`, enter the Password*, and then press `PRINT`.
    Note: The default password is `0` `0` `0` `0`.

2. Press `7` `1` and the Total Price Display will show the current *Adjust Number* which should be between 20 and 30; 25 is the nominal value.

3. Press `2` `5` `PRINT` `2` the *Label Format Setting* will appear in the Total Price Display.

4. For ***LST-8010*** labels press `3` `3` `PRINT`; for other labels, see your Owner's Manual. Do **NOT** proceed until you have entered the correct *Label Format Setting*.

5. Press `4` if the scale gives a double-beep <u>then</u> go to **Step 7** <u>otherwise</u> press `1` `PRINT`.

6. Press `5` if the scale gives a double-beep <u>then</u> go to **Step 7** <u>otherwise</u> press `2` `PRINT`.

7. Make sure that the labels are installed correctly and press `8` `1`.

8. In **Step 9** the scale will feed and print several labels. You must remove these quickly as the come out but do NOT yank them out; always remove the printed labels by pulling towards you (the front of the scale) and not to the side.

9. Press `7` (If no labels came out you may need to press `7` again.)

10. Check the values on the LCD Display. The values need to be between 70 and 110.

11. If the ***Gap value*** is not within range, press `SAVE` and go back to **Step 9** or go to **Step 12**.*

    Note: You may need to repeat this step more than once.

12. Press `SAVE` `ESC` `ESC` `ESC` `SET`.

13. Press `FEED` and print out some labels. If you do not get the results you desire, you may need to have the scale serviced.
