

WHERE FASHION MEETS FLOORING

SPECIFICATIONS
REDWOOD COLLECTION

Table with 2 columns: Specification Name and Value. Includes items like Style name (Redwood), Pile Weight (55 oz./yd.²), Total Weight (96 oz./yd.²), Construction (1/2" tufted loop pile, Rib pattern), Fiber (100% wool), Pile Height (12mm /0.47"), Total Height (15mm /0.59"), Pattern Repeat Width (.5"), Pattern Repeat Length (.5"), Width (13'2"), Backing (jute 7oz.), Flammability (Pass), Smoke Density Test (Pass), Flooring Radiant Panel Test (Class 1), and Country of Origin (China).

Product specifications are derived from averages, allowing for normal manufacturing tolerances. As is the case with all textiles, colors are subject to dye lot variations. Installation should be done only by professional installers with specific expertise with premium broadloom. DOMA recommends that installations be completed by CFI certified carpet installers with an R2 rating or equivalent. For conventional tack and pad installations we recommend use of a firm, dense pad.

Fluffing or shedding is a normal occurrence with fine broadloom and natural fibers and does not affect the overall performance of carpet. Shedding will dissipate with routine vacuuming. Roll crush is a temporary flattening of carpet pile and can occur with all carpet. Roll crush marks are characterized as a perceived change in the color. Across the width of carpet that appear darker when viewed from one direction and lighter when viewed from the opposite direction. This is not a manufacturing defect and is usually self correcting by allowing the newly installed carpet to "blossom" as it adjusts to the ambient conditions. Increasing the relative humidity in the room to 50% or more along with routine vacuuming will expedite pile recovery.

CARE AND MAINTENANCE:

Proper and routine vacuuming of carpet is the best way to keep carpet clean. DOMA recommends using a suction only vacuum or a vacuum which allows for the brushes to be turned to the off position. Overly aggressive agitation of a vacuum can cause damage to all fine carpets and or natural fibers. When spot cleaning carpet always test colorfastness in an inconspicuous area. Always remove any solids before attempting to clean. For liquid spills gently blot the spot with a clean absorbent white cloth. Do not rub the spot or use a colored towel or cloth as this could result in damage to the area. For cleaning of large areas, rooms or deep cleaning seek a reputable professional carpet cleaning company with specific knowledge of cleaning the specific fiber of your carpet.
