Your individual hardwood floor for humid rooms

A WIDE RANGE OF APPLICATION POSSIBILITIES

marinaflexx was specially developed to allow a hardwood floor being installed in any indoor room, especially also in wet areas and humid rooms. The pre-oiled surface is slip-resistant and the waterproof rubber joints make this wood flooring perfectly resistant to moisture.

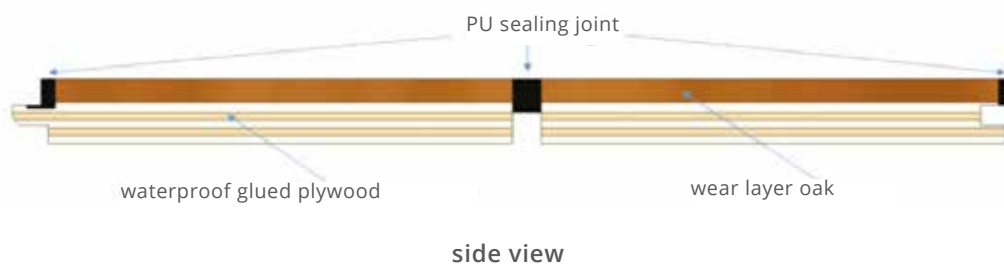

With its unique look and high resilience it's the perfect hardwood floor for the use in any living areas, bathrooms, wellness areas, hotels, restaurants or office rooms.

THE MATERIAL

Sonnberg Parkett - a multi-layer structure made of waterproof glued plywood with a fine wood overlay. Only wood from sustainable forestry, 100% made in Austria. The robust Marinaflexx multi-layer prefabricated parquet elements consist of an approx. 3.5 mm thick wear layer. The approximately 10 mm thick elements are provided with a nut and spring all around, as well as the permanently elastic Flexx joint, thus offering optimal protection against the ingress of moisture and moisture.

THE FLEXX-JOINT

This elastic joint technology is used on most ship decks all over the world and has proven itself for many years. This gives marinaflexx the certainty that no water penetrates the joint and keeps the natural joint-free optic over a lifetime.

The black joint creates a flexible, universally applicable wooden floor. The expansion joint allows 5-fold expansion and counter-expansion and thus absorbs the swelling and shrinkage of the parquet plank, prevents the formation of joints and guarantees to remain sealed.

The permanent elasticity is given in the temperature range from -40° to +100°C.

WOOD FLOORING SYSTEM FOR HIGHEST DEMANDS

THE SURFACE

Based on craftsmanship, many years of experience and intensive research in the parquet floor sector, a waterproof real wood floor was developed that offers a wide range of possible uses.

The careful surface treatment with high-quality oils ensures the tactile feeling of the real wooden surface.

Thanks to its special surface, Marinaflexx is extremely easy to care for and is also suitable for areas that require a lot of cleaning.

THE INSTALLATION

As a finished parquet, marinaflexx is ready to be laid and can also be walked on immediately. The marinaflexx floorboards are ready for installation without any rework.

Based on its renovability marinaflexx has a long service life.

The waterproof gluing and full-surface bonding to the surface ensure also years of problem-free use. A professional installation of your marinaflexx parquet floor by a specialist entitles it for a product guarantee of up to 10 years.

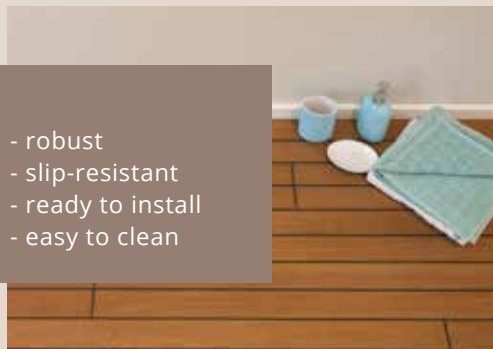

THE MAINTENANCE

Easy and uncomplicated to clean and maintain - best with the oil care sets for Sonnberg products.
