Safety Information

- To clean our products, spot clean, or use a damp or dry cloth with a gentle swiping motion of the hand.
- Although durable, do not use heavy striking motions, pressure, or force when cleaning or using these collars/leashes to protect the collars from unwanted damage.
- Although all of our products are weatherproof, you must make sure to keep all battery and electrical components dry when cleaning or being put to use.
- Do not allow the products to be submerged in water, as this could result in a complete product malfunction.
- Always charge the LED Collars while they are turned off.
- Do not connect the included charging connector to adapters above 5V.
- Always refer to the dog neck sizing guidelines located on page 12 before purchasing your next K-9ightLights dog collar.
- Always operate our products as directed in the manual. Our company will not be responsible for any loss or injury associated with our products or that have been caused by improper use.
- Collars are to be worn by pets only.
- To find more information on our products, use your phone & scan the QR code to subscribe to each of our channels and stay in the loop with the best pet innovations to come.

About Us

K-9ightLights L.L.C. is here to provide the absolute best led dog collars and leashes in the world! We spend an abundance of time to ensure that our products excel in the market and meet the needs of every dog owner. We do not discriminate, as we love each and every individual, just as we are asked to love ourselves.

My wife and I started this business with the goal to help save dogs lives and to bring more light to others. We essentially wanted a night light for our K-9, so that they would be clearly seen in the dark. We have spent years designing and perfecting the brightest and best led dog collar and leash on the market today and plan to be around for many decades to come. With K-9ightLights L.L.C., we plan to help millions of pet owners with their needs and hope to save the lives of many dogs from accidents that could occur at night by being clearly visible to all passerby's.

We bring forth a set of unique, new, and innovative products that will expand greatly in order to impact people in the best way possible. Our collars and leashes allow you to bring your dog out at night in style, and that's just how we do things around here.

We are chosen to be followers and disciples of Jesus Christ. It is our duty to spread His good word and bring about His Will and Light to others, so that they might serve and be a part of His Incredible Fellowship!

We plan to always be the leaders in the pet industry, and would like to reach everyone we can with our awesome products. As we grow, we plan to help everyone we can along the way, in hopes of inspiring others to become the best version of themselves possible. Thank you for your purchase. We hope you will tag us in a photo with your furry friend wearing their K-9ightLights L.L.C. collar/leash. Scan the QR Code to follow us and tag us!

Instructions

Take out the collar and insert the smaller, mini usb end of the connector cable into the slot on the side of the dog collar battery pack. The charging port on the collars and leashes will be located on the battery pack beside where you see our company's logo.

With the collar led power turned off, plug the other, larger end of the usb cable into a power adapter to begin charging the led collars/leashes.

Once fully charged, remove the collar or leash from the charging cable and measure to the appropriate size of your dog.

Adjust the tightness of the led collar according to the size of your pet and insert both ends of the buckle clip together making sure that the buckle is securely and safely positioned.

Make sure that the collar adjustment is not too tight for your pet and allow for at least two fingers to fit underneath the collar and your dog for safety of your animal.

Making sure the collar and/or leash has been fully charged, firmly but not forcefully press the K-9ightLights L.L.C. rubberized logo in the center to get the initial LED lighting effect.

To avoid early draining of the battery and to keep that eye catching "wow" factor of our collars and leashes, make sure to only keep the LED light mode turned "on/flashing" when dark or when in use.

Our battery is only meant to be used for the lifespan of an average walk or two, and is very bright as long as you keep it charged daily or remember to recharge after each use.

Once the battery has drained completely, re-charge the device and repeat the steps as needed above.

By doing so, you are ensured much greater safety of your amazing furry friends, as well as the safety of being seen yourself when walking at night.

We would like to personally Thank You for purchasing, supporting, and enjoying K-9ightLights LLC.

How To Recharge your LED Dog Collars/Leashes

The product includes a charging cable, which is designed to be compatible with any regular sized USB electrical outlet connection.

The Mini USB side of the charging connector cable (included) is to be plugged directly into the side of the led collars battery pack, with the LED device turned to the "off" mode.

Must be connected to a Power Adapter Rated within the ranges listed below:

- Input: AC 100-240V – 50/60HZ – 0.15A
- Output: DC5V – 1A/2.1A

How To Power On, Off, and Cycle Modes

From Off Mode:

- 1st Button Press: Quick Illuminating/Quick Dissipating Flashing Light Mode
- 2nd Button Press: Slowly Illuminating/Slowly Fading Flashing Light Mode
- 3rd Button Press: Solid LED Light Mode
- 4th Button Press: Turns Off LED Light

Please remember to turn off the LED Light each time before charging cycles.

Using slightly firm pressure with your finger, quickly push down directly in the center of our K-9ightLights L.L.C. rubberized logo.
