## SETTING THE TIME

### RONDA POWERTECH

MOVEMENTS CALIBER 515.24H

This watch has been assembled with a genuine Swiss Ronda movement from the Powertech family. It is extremely accurate and rated within -10/+20 seconds per month.

Please note that it is extremely important to firmly screw the crown down after setting the time in order to avoid water damage and to retain the rated water resistance. Failure to screw down the crown can result in water damage that will not be covered under warranty.

**LOCKED POS.** (CROWN SCREWED IN) 200M WATER RESISTANCE - READY TO WEAR

**UNLOCKED POS.** (CROWN SCREWED OUT) NO WATER RESISTANCE

#### POS. I SETTING DATE & 24-HOUR DISPLAY (GMT HAND)

- Unscrew and pull the crown to position I
- Rotate clockwise to adjust the date and counter clockwise to adjust the 24-hour display
- Push the crown to Unlocked Position, then in one motion push crown in and screw down to Locked Position

#### POS. II SETTING THE TIME

- Unscrew and pull the crown to position II
- Rotate clockwise until the current time is displayed
- Push the crown to Unlocked Position, then in one motion push crown in and screw down to Locked Position

#### SETTING AM/PM (MIDNIGHT/NOON)

When setting the time (POS II), rotate the hour hand past 12 o'clock and note the date window. If the date changes it is midnight, if the date does not change it is noon.

### INTERCHANGEABLE STRAPS

The included Stainless Steel Bracelet and Sweat Resistant Rubber Strap both utilize quick release spring bars for seamless strap swaps.

- ① Stainless Steel Bracelet
- ② Rubber Strap (UV and sweat resistant)
- ③ Quick Release Spring Bars for Seamless Strap Swaps

### CHANGING THE BEZEL

Twist and pull to remove the bezel. Replace by firmly pressing new bezel onto the case.

- ④ Pull Up While Turning To Remove Bezel
- ⑤ Replace By Pressing New Bezel Down

## CARE & MAINTENANCE

This watch was designed with extreme conditions and daily wear in mind. When cared for properly, it will last decades.

Recommended Service Interval: every 2 years.

**BUILT FOR ANYTHING. DESIGNED FOR EVERYDAY.**

The most vulnerable part of the watch is the crown, ensure it is firmly screwed down at all times to maintain water resistance. Rinse with fresh water after salt water exposure. Rubber strap recommended for aquatic use. Periodic cleaning with mild dish soap and warm water is recommended.

**REVIEW OTHER BEST PRACTICES:**

Visit [ridge.com/watchcare](https://www.ridge.com/watchcare) for more info.

## LIMITED LIFETIME WARRANTY

**BUILT TO LAST.**

We design our products to eliminate excess and build them to performance grade so they last for longer: as in a lifetime. This watch is rated to diver specifications of 200 meters of water resistance, however must have the crown screwed down at all times to retain water resistance and warranty coverage. If you have any issues with your watch, reach out to us and we'll make it right.

## CARRY LESS. LIVE MORE.

For The Ridge, it's not just a remark on resourcefulness; it's a call to maximize your life by minimizing what you bring along.

You don't need everything to be prepared for anything. We help you streamline your life by turning the things you carry every day—like wallets, watches, and rings—into tools for better living.

BUILT FOR ANYTHING. DESIGNED FOR EVERYDAY.

## WHO WE ARE

We've taken our innovative design and material approach to create products you can rely on. The items you carry every day are your tools for better living — make them something you can count on.

## MISSION STATEMENT

You cannot build quality products without quality materials. Our material-first approach to design means we're investing in your gear at a foundational level — and making it look good while we're at it.
