

HOW TO GROW YOUR MUSHROOM

KING OYSTER

THE FRUIT

8 inches long and 2 inches in diameter, with thick, meaty stems.

TEMPERATURE

Cropping requires an optimum temperature of 15-18°C

HUMIDITY

Mushrooms need very high humidity to form. Around 80-90%. That's why you need to spray your kit with water everyday. It also helps to leave it in a semi-closed plastic container.

SPECIAL

King Oyster likes to grow under a layer dirt. Completely remove the plastic around the substrate. Then put the box on it's side so that the opening is facing up. Then pour a layer of dirt over the substrate in the box of about 2 cm.

BEFORE USAGE

You can leave the kit in the fridge for up to a month before you use it.
